LED visual physical therapy

The colored lights on the surface of bathtub and at the bottom of the pool can change
a variety of colors circularly, to relax the body and mind inside the colored lights and
fully enjoy the bath fun the light and water bring for you.

Phototherapy is a kind of physical treatment, to treat various diseases through adjusting
the immune system by hypothalamus under the lights of different colors and different
wavelengths by putting the fluorescent lamp into the phototherapy box.

CORE TECHNOLOGY
SPA massage system

**Torrent surfing
massage**

The effervescent bubbles like champagne slowly rises from the water, making skin be absorbed in the favor of the water flow. The changing water lights can ensure peaceful feelings of the heart and nature - being attracted by the water.

**Adjustable surfing
nozzle**

The physical therapy on different parts of the body comes from water flow massage from different positions, matched with different designs of nozzles, so as to relax muscles; the all-around and combined massage relax can provide whole body with enjoyment of physical therapy.

CORE TECHNOLOGY

**LED annular water
outlet design**

LED annular water outlet design; integrated constant temperature water circulation system has perfect combination of appearance and function.

**Clean water drainage
design**

Innovative drainage structure has more thorough flushing and more convenient cleaning; 360 degrees of cleaning has no dead angle, which is clean, easy and visible.

Surf sprinklers

Exquisite without being complicated, the generous bathtubs without being complicated, the generous bathtubs from this series open up a completely new dimension, also brings a new whole feeling for using water.

The pursuit of quietness is not the unique right for refined scholars, and it should also be called a new culture phenomenon. In this period filled with high-speed development in materials, culture has become a way of self-cultivation and a pot of mind tea, and the more people ~~cultivate~~ scholars they more own it

The pursuit of quietness is not the unique right for refined scholars, and it should also be called a new culture phenomenon.
