Exquisite fires for elegant homes

Wildfire are dedicated to the design and manufacture of innovative and attractive fireplaces for British homes. At Wildfire we are committed to providing the highest quality heating products with a proven performance. Our innovative range of gas and electric fireplace suites have been tested to comply with the latest British and European standards and are manufactured in an ISO certified factory.

Wildfire are a multi award winning gas appliance manufacturer.

The HE950L Seville Suite was named not only Gas fireplace suite of the year, but also 'Product of the Year' at the 2018 Hearth and Home exhibition.

New for the 2023/2024 are the Ravel 400C & 400T balanced flue stoves and the impressive Ravel 550 fires. Contact your dealer for a demonstration.

The Wildfire gas product range includes many products which have been designed and approved with efficiency at their core. In a world where energy costs have soared we believe it is important to obtain the absolute maximum from your heating appliance.

With this in mind the net efficiency of Wildfire open fronted gas fires are up to 62% and the glass fronted fires up to 87.2%. So when you purchase a Wildfire heating product you can be confident that you will be installing a product that will deliver in all installation scenarios. Here at Wildfire we are devoted to innovative design whilst maintaining maximum functionality. All Wildfire slide control gas fires feature the latest patented Direct Slide technology.

Wildfire is the premier gas and electric appliance brand from Hearth Products Limited. Hearth Products has been actively involved in design and technology for the fireplace industry across the globe since 2003. Our product technologies have been used in products across Europe, Australia and North America.

See full details of our product range at either www.wildfiregas.co.uk or www.wildfireelectric.co.uk

HE950L Seville Suite

Some things you need to know

Do I need a Convector or a Radiant Gas Fire?

It is important to know the difference between Radiant heat and Convected heat.

Radiant heat. In short, Radiant heat is emitted from all Wildfire appliances. This type of heat is actually infrared and heats objects in the room. Radiant heat is considered to be the most comfortable and natural form of heat.

Convected heat warms the air in the room. By passing the cooler air which enters the appliance at the bottom, through a heat exchanger, it warms up, then emits the hotter air back into the room from the top of the appliance.

Do I need a Glass Fronted Gas Fire?

A glass fronted fire will be more efficient and therefore more cost effective to run. Glass fronted appliances are usually more expensive to buy.

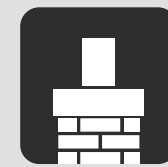

In general terms, it is usually more cost effective to purchase a glass fronted appliance if it is to be used more regularly as the efficiency savings will provide a quicker payback for the more expensive appliance. It is also important to remember that a glass fronted appliance will normally provide a similar amount of heat to an open fronted appliance, however, as it is more efficient, it is cheaper to run.

We guarantee* our gas fire products for a period of 5 years from installation and our customer service staff are always on hand to help you with any query you may have with your product.

Our 5 year limited guarantee* is managed directly by Wildfire through our extensive network of service centres throughout the UK. Choose Wildfire for style, performance, reliability, value and peace of mind.

What type of flue do I have?

Brick Chimney

Pre-Fabricated

Pre-Cast

Balanced Flue

You will need to know what type of flue you have in your home. You will see these icons on each product page which will show if the appliance is suitable for your property. It may be that you have a Brick Chimney (otherwise known as a Class 1 flue), a Pre-Fabricated Metal System (which can be a Class 1 or Class 2 flue) or a Pre-Cast Flue (a flue which is built into the inner brickwork of your home). If you do not have a chimney or flue system in your home then you will need to look for a balanced flue gas fire which, if you already have a balanced flue gas fire in the property, is usually indicated by a flue terminal concealed within a basket on the outside of the property.

What control options are available?

Manual Control

Slide Control

Manual Electronic Control

All Wildfire products are available with a Direct Slide option giving you the ease of reliable and simple operation. The slide control provides ignition, flame control and turns the fire off when you're finished. Most of the Wildfire range is available in manual control too — these fires have a removable cover at the base of the fire where the rotary control and igniter are situated.

Wildfire have now introduced electronic ignition on the majority of the manual control range.

What type of gas do I need?

Natural Gas

Wildfire appliances are currently only available for natural gas.

Function & Performance

O.D.S

The Oxygen Depletion Sensor will automatically shut off the gas supply to the burner if the oxygen level in the room falls below a particular level. This is important as it will turn off the appliance should the flue become blocked or a lack of ventilation occurs.

F.S.D

The Flame Supervision Device is designed to sense the presence of a flame. Should the flame be extinguished for any reason then the safety device will cut off the supply of gas to the burner.

Optional Ezi-Grip Handle

Most Wildfire appliances can be fitted with an elderly/infirm handle to ease the lighting operation. This larger handle is much easier to access and move so if you think that this may be a requirement then talk to your retailer who will demonstrate the Ezi-Grip system. This handle is purchased as an accessory and is fitted at the point of installation of the appliance.

The Wildfire range is proud to now include a range of glass fronted high efficiency gas fires. These products feature the latest technology in high output gas fires and deliver the most effective way of heating your living room. The range includes both mid-depth convector and full depth convector products, both available with Direct Slide Technology. The Ravel 400 appliance can also be installed into a hole in the wall by fitting the 4 sided HIW trim (See pages 40 and 41). The balanced flue gas fires are a high efficient appliance solution for homes with no chimney, the Thermes & Ravel 400 BF deliver heat, value for money, efficiency and are available with a large range of trim options.

Open fronted appliances are designed to operate with the revolutionary XE system which is only available from Hearth Products. This new efficiency system is designed to 'tune' the appliance to your fireplace flue, thereby ensuring you obtain the maximum output from the appliance.

Regulations demand that gas fires must be installed by a Registered Gas Safe Engineer. For further information regarding Gas Safe requirements contact Wildfire directly, where we will be happy to give you advice. Warranty will be void if the appliance is not fitted in accordance to these legal requirements.

The Ravel 1500 MW fire provides an astonishing solution for a gas media wall.

This balanced flue appliance will provide the heart to your media wall. With impressive heat and an unrivalled flame picture, the fuel bed is intricately detailed to reveal the perfect log fire. A convection system forces cooler air through the side grills and up through side outlets at the top of the chimney breast, or through a stylish linear outlet above the television. The installation allows all the unsightly cables to be concealed whilst delivering a stylish and functional media wall to your home. Spot heating with a gas appliance is the most cost effective method to heat a room, allowing the central heating boiler to be turned off for longer periods...the Ravel Media Wall fire is a powerhouse of heat.

The Ravel 800 BF is a new product designed to operate in buildings without chimneys or flues, which will be available in winter 2023. This product follows in the footsteps of its extremely successful sister model the Ravel 800 (conventional flue).

The Ravel 800BF incorporates all of the features available on other Ravel products including underlog burner technology, turndown function allowing the rear burners to be turned off to retain flame picture on low and a reliable and easy to use slide control system.

Shown here in the Asti 800BF Limestone suite, this fire is available with two trim styles, the Edge, for the sleek trimless look (supplied with product) or the wider standard trim – see page 23 for details.

The Ravel 550 log fire is a revolutionary product.

This wide format glass fronted gas appliance has the appeal of a European fire but the benefit of fitting into a standard 16" x 22" chimney builders opening. The fire incorporates under-log burners to provide the most realistic effect, with a unique turndown feature allowing the rear burners to be turned off independently to keep the flame picture alive when running on low.

This installation requires a back panel with specific opening sizes and a 75mm rebate. Normally an appliance of this stature would require building work and installation of a lintel. Talk to your dealer for full details. The Ravel 550 is supplied with slide control as standard.

The Ravel 400 is now available in balanced flue format. With the same intricately detailed logs and unique underlog burners this appliance is the perfect solution for economic heating in homes without a flue.

The product is available with the two standard Ravel 16" trims in Black Nickel and Chrome or Anthracite but can also be configured to be installed as a hole in the wall (HIW) see page 40, or as an inset stove—see page 38. The Ravel 400BF also employs the same controllability as the conventional flue version, allowing the fire to be turned to a low setting whilst still retaining an impressive flame height.

The Asti Chamber Suite can be ordered as a package with either the 400C or 400T gas stoves.

The mantel dimensions can be found on page 15. The package includes mantel, hearth, chamber and back hearth.

The Ravel 400T gas stove is a beautiful timeless addition to any room. The product features all the benefits of the proven Ravel burner system.

The stove is easy to control with a simple slide lever located below the glass screen. It features a light weight aluminium casting which provides crisp and clean lines, aesthetics are at the heart of this product. The fire incorporates under-log burners to provide the most realistic effect, with a unique turndown feature allowing the rear burners to be turned off independently to keep the flame picture alive when running on low.

And, just like the Ravel 400C, it can be installed into Class 1, Class 2 and precast flues*. The Ravel 400T is also available as a balanced flue model (Available from Winter 2023, see pages 48-49). The Asti Chamber Suite is available to order as a complete package, a wide variety of chamber designs are available, including charcoal or olive waterfall slate, staggered black or oyster slate and a variety of brick or limestone designs. Ask your retailer for details.

Inset shows Ravel 400C BF

The hugely successful Ravel 400 gas stoves will now be available as Balanced Flue versions. Both the 400C and 400T models can now be installed into a property with no chimney.

The products feature all the benefits of the Ravel gas fire range, with under-log burners and a turn-down function which keeps the flame picture alive on low setting. A false vertical flue kit is also available as an option to create the authentic look of a chimney installation. The Asti 750 Chamber Suite is also available to order as a complete package – see page 47 for full details.

The new HE950L (STD & PCF) is the perfect appliance to bring your fireplace to life.

Just like the HE900, its predecessor, this fire fits into your standard 16" x 22" builders opening or precast flue if the PCF version is ordered. No building work, lintels, mess or costly installation. The fabric of your home will remain intact but you will benefit from a landscape, large format gas fire with beautifully crafted logs and colourful dancing flames. Ask your retailer for the different fireplace design options available with the HE950L, they will be able to deliver a suite to compliment the style of your living room.

The HE900 is the flagship model from Wildfire, the ultimate in fireplace technology.

The HE900 gas fire is revolutionary. It has been developed to create a European format appliance with expansive viewing glass that can be installed into a conventional 16" x 22" fireplace opening without any modification, or precast flue where the PCF version is ordered. This patent pending product is designed to fit UK fireplace openings with no need to alter the fabric of the building.

The HE900 features a stunning log and ember bed, easily controlled with a slide operating system which comes as standard. Finally, the ultimate fireplace solution has arrived..

The Avellino micro marble suite is available in white or white with grey border.

Some things you need to know

All of our electric appliances provide up to 2kW of instantaneous heat. At the push of a button, or from a programmed timer, this clean convected heat will power warmth into your room whenever you need it.

A mesmerising flame effect completes these beautiful products. With stunning log arrangements and a choice of three levels of flame control and up to five brightness/intensity levels. The vibrant flame effects provide that feeling of comfort even when the heat is not switched on. The flame effect system is a safe convenient and efficient design which uses only LED technology to ensure that running costs in flame only mode are extremely low.

The Wildfire range of suites couple this electric fire technology with exquisite micro marble fireplaces. Available in a range of colours (see page 82) these suites all allow a flat to wall installation*

Electric Fireplace Suites

*The Panama E22 and Ravel E16 installed in the Salvador suite require a spacer frame (supplied separately) to allow flat to wall installation. If no spacer is required for this suite then a 65mm recess for the width and height of the appliance is required.

We guarantee* our electric fire products for a period of 1 year from installation and our customer service staff are always on hand to help you with any query you may have with your product.

Our 1 year guarantee* is managed directly by Wildfire through our extensive network of service centres throughout the UK. Choose Wildfire for style, performance, reliability, value and peace of mind.

The distinguishing feature of a flame effect electric fire is the ability to provide a 'feel warm' comfort level with its' mesmerising glow at any time of the year. An energy efficient way to produce a stunning effect with minimal running costs. The instantaneous heat can be called upon on those colder evenings when its just not practical or cost efficient to turn on the central heating.

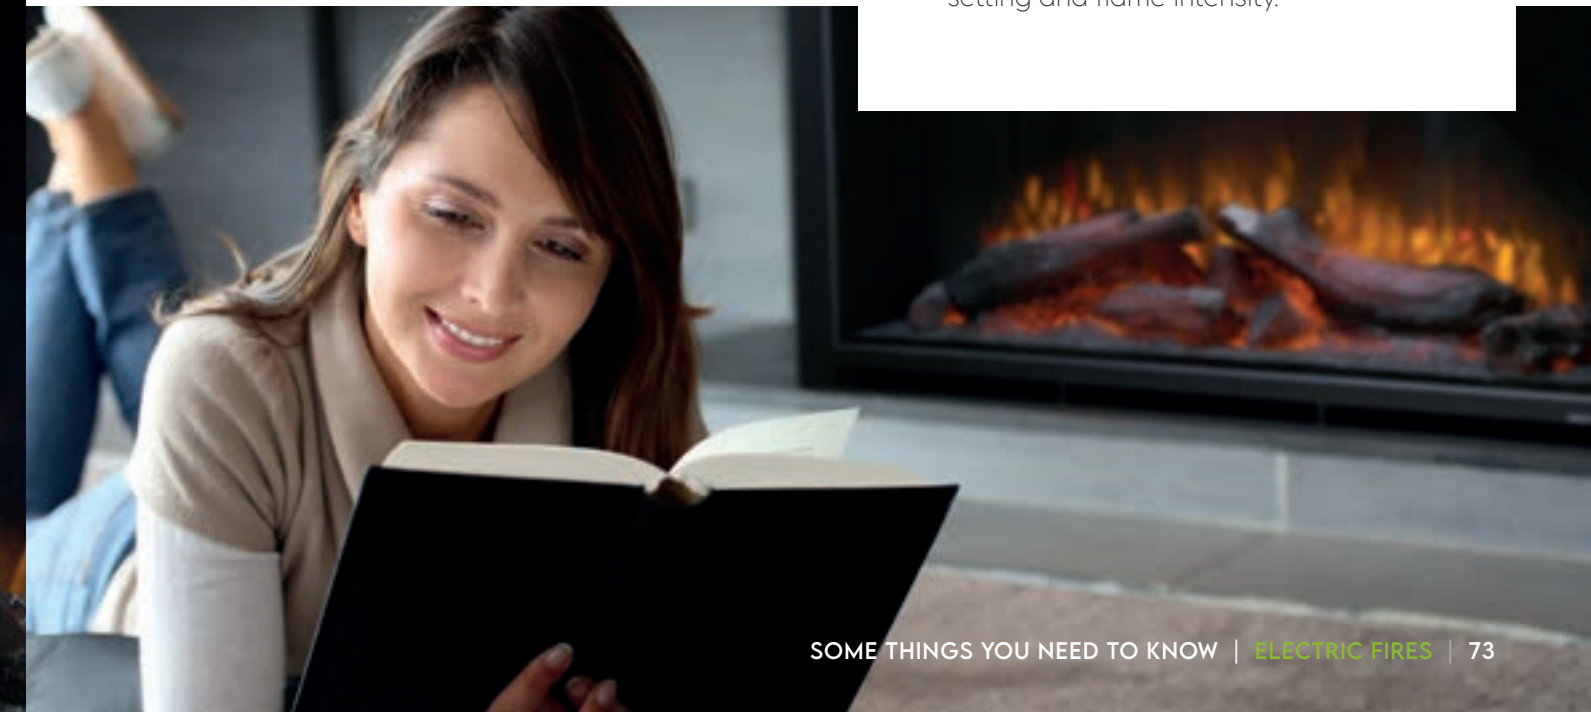

What control options are available?

The multifunction remote control handset provides ultimate controllability for your electric appliance. From 'Normal' operating mode where the appliance will run continually until the required temperature is set, to daily or weekly timer settings to give you complete control over the heating function.

A countdown timer is also included so the unit can be automatically be powered down after a predetermined length of time.

This beautifully styled remote features an internal thermostat to ensure it senses the right temperature in the room. An LCD display features all of the control functions available including flame setting and flame intensity.
