DESCRIPTION

Operation

To Load Napkins or Tampons

- 1. Remove napkin or tampon weight from the guide.
- Insert products into each channel
 - Replace weight on top of product.

To Dispense Napkin or Tampon

1. Insert coin in coin slot, turn handle clockwise and release. When all products have been dispensed, the weight actuates the "EMPTY" indicator which blocks coin slot and prevents another coin from being inserted.

NOTE: For best vendor operating performance, product packages must meet the following size requirements: Napkins - 3" x 4-1/4" x 1"; Tampons - 5-1/8" long x 3/4" diameter tubes. Contact your local sanitary supply distributor to purchase product.

Maintenance

If Vendor Fails to Operate Properly

Make sure that:

- Vendor is loaded with correct size napkins and tampons
- Damaged napkins or tampons are not jamming mechanism.
- 3. Weights are in place on top of napkins and tampons
- Napkin cam is properly installed so that cam rotates clockwise.

Coin box is not full.

To Replace or Convert Coin Mechanisms

- Order new coin mechanism by part number for coin denomination desired (see above).
 Remove existing coin mechanism by unfastening two screws. Save Screws.
- 3. Install new coin mechanism with two screws. NOTE: Make sure tampon cam is properly installed with top of cam at "2 o'clock" position.
