

# POLARN O. PYRET

## Our Suppliers

Polarn O. Pyret doesn't own any factories – instead we work in close partnerships with a carefully selected number of external suppliers worldwide to manufacture our garments. These suppliers are crucial to our success, which is why long term and close relationships with our suppliers are a key factor in our production strategy. Working with fewer suppliers gives us greater possibilities to influence each factory, as well as better control in our supply chain. With a shared vision of a more sustainable industry, we work closely with our suppliers to move beyond compliance and towards continually improving environmental, social, and quality performance.

It is important for us that our customers and other stakeholders have insight into our operations. Therefore we publish an updated supplier list of the production countries and production units (sewing units) that manufacture our products twice per year. The criteria for a production unit to be listed is that the value of our total production exceeds SEK 100,000 per year, and that we have worked with the factory for at least one season. The public supplier list corresponds to 99% of our total order value.

In the supplier list, we report which valid third-party inspections or certificates have recently been carried out on each production unit, and to what extent the factory complies with BSCI's code of conduct according to 13 specified categories. Each category in an inspection is ranked from A (Very good) to E (Unacceptable). We report the percentage of the 13 categories that received A (Very Good) or B (Good) on the most recent inspection, i.e. the best results.

Latest update: 230503
