MEASUREMENT INSTRUCTIONS

This is a step-by-step guide to accurately take all the required measurements to make a properly fitting made to measure suit. Carefully follow the instructions and refer to the diagrams along the way.
As our products are made to measure we do not accept returns unless faulty, measurements are the responsibility of the customer.
By signing the measurement form you agree that all measurements are correct.

HOW TO MEASURE

- All measurements should be taken by a professional ie. tailor or alterations shop.
- Never measure yourself, always have someone do it for you.
- Wear a close fitting base layer ie compression garments or sport shorts and T-Shirt.
- If you wear looser clothing ensure the measurements are taken right against the body. Do not wear jeans or any other bulky clothing.
- The measuring tape should sit snug against your body without pinching the skin, to give true measurements. Keep the tape close against the body but not too tight.
- Stand straight with muscles relaxed.
- If you wear a back protector for riding, ensure you wear it when taking your measurements.
- Ladies note extra measurements required at the end of the form.

YOUR MEASUREMENTS

Follow the measurement guide carefully, and always check your measurements twice!

1. CHEST _____ CM

Refer Diagram A

Wrap the tape around the chest at the fullest part, often in line with the nipples but wherever is biggest, then place your arms by your sides and relax. If you wear a back protector ensure you wear it during measuring to ensure adequate room. Breathe in, and record measurement. For women's suits see extra measurements on page 4, also women should wear a sports bra when taking measurement.

2. WAIST _____ CM

Refer Diagram A

Find your navel and wrap the tape around the waist at this level, wearing back protector if applicable.

3. NECK _____ CM

Refer Diagram A

Measure around the base of the neck. This should give an indication of where the lower edge of the collar and top of the front zip will sit, usually between the collar bones as shown in blue in **Diagram A**. Ensure this is comfortable to avoid the neck being too tight.

4. ARM LENGTH _____ CM

Refer Diagram A

Bend the arm to an L-shape and measure from the pivot of the shoulder (shown in blue in **Diagram A**) all the way along the outside of the arm to the most prominent part wrist bone, not the back of the wrist, via the elbow point.

5. SHOULDER TO ELBOW _____ CM

Refer Diagram B

Bend the arm to an L-shape and with the tape close against your skin measure from the pivot of the shoulder (as above) to the point of the elbow joint (shown in blue in **Diagram B**), along the outside of the arm.

6. ELBOW TO WRIST _____ CM

Refer Diagram B

Bend your arm to an L-shape and with the tape close to your skin, measure down the outside of the arm from the point of the elbow joint to the most prominent part of the wrist bone as shown in **Diagram B**.

7. UPPER ARM _____ CM

Refer Diagram B

Flex your bicep and measure the circumference of the fullest part.

8. FOREARM _____ CM

Refer Diagram B

Flex your forearm and measure circumference of the fullest part.

9. WRIST _____ CM

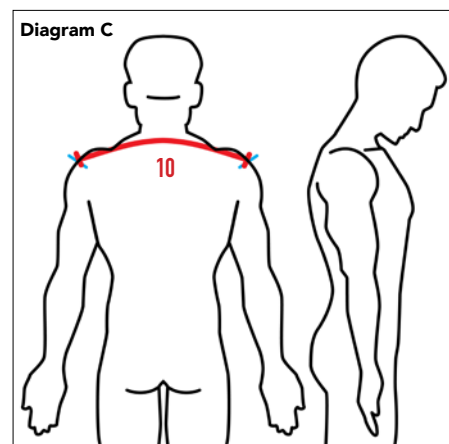

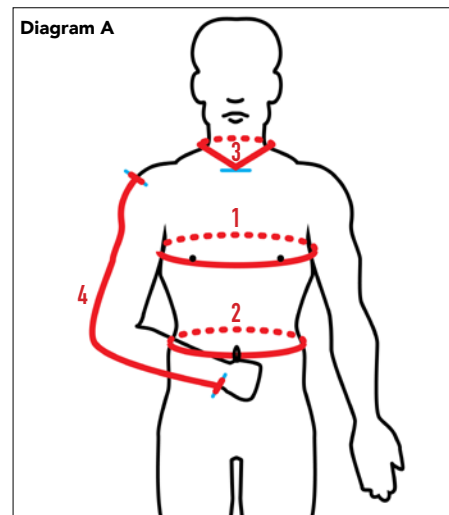

Refer Diagram B

Measure the circumference of your wrist in line with the wrist bone, ensuring it is comfortable and not too tight.

10. SHOULDER WIDTH _____ CM

Refer Diagram C

Hang head and neck forward, and lower arms and bring slightly forward to simulate riding position. Measure across the back between the top of the shoulder pivot points, from the point where the seam would appear as shown by blue line in **Diagram C**.

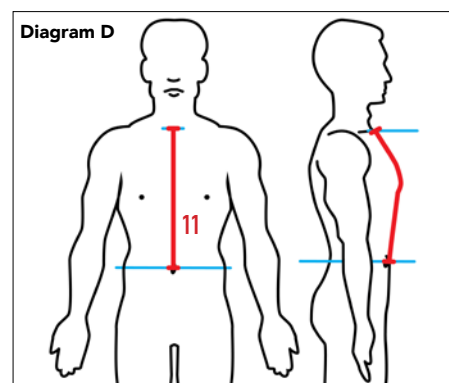

YOUR MEASUREMENTS

Follow the measurement guide carefully, and always check your measurements twice!

11. FRONT NECK TO NAVEL _____ CM

Refer Diagram D

With the tape close to your skin and in line with the curve of your body, measure from the centre of your collarbones down the front of the body to the navel line, ensuring the tape is not too tight, refer **Diagram D**.

12. BACK NECK TO NAVEL _____ CM

Refer Diagram E

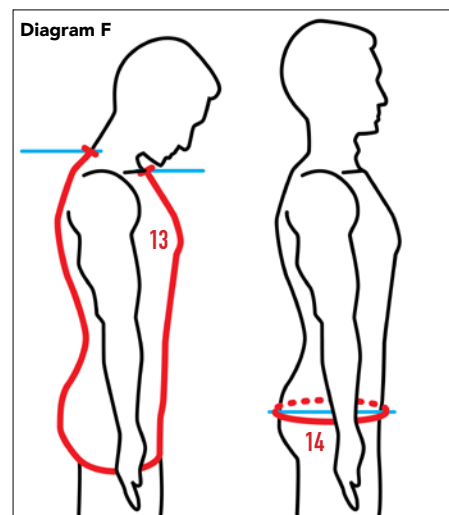

Hang head and neck forward. With the tape close to your skin and in line with the curve of your body, measure from the nape of your neck (the end of the cervical vertebra) down the back to the navel line, in line with the front navel line.

13. FRONT NECK THROUGH CROTCH TO BACK NECK _____ CM

Refer Diagram F

Stand with your feet slightly wider than your shoulders. Begin with the tape between the collarbones, and follow the front of the body passing the tape under the crotch and up to the nape of the back neck (the end of the cervical vertebra), with head and neck tilted forward to give the longest measurement. Follow the contour of your body, keeping the measuring tape close against your skin but not too tight.

14. HIPS _____ CM

Refer Diagram F

Stand with your feet slightly wider than your shoulders. Pass the tape close around your hips at the widest part of the seat, where the bottom of the front zip would be.

15. UPPER THIGH _____ CM

Refer Diagram G

Bend your leg to an L-shape (place your foot on a chair or low stool) and measure the circumference of the fullest part of the thigh, usually around 10cm below the crotch line.

16. LOWER THIGH _____ CM

Refer Diagram G

Bend your leg to an L-shape (place your foot on a chair or low stool) and measure the circumference of the thigh, approx 10cm above the knee cap.

17. KNEE _____ CM

Refer Diagram G

Bend your leg to an L-shape and measure around in line with the centre point of the knee cap.

18. CALF _____ CM

Refer Diagram G

Bend your leg to an L-shape and tense the calf muscle, measure the circumference of the fullest part of the calf.

19. ANKLE _____ CM

Refer Diagram G

Measure the circumference of the ankle at the ankle bone. Ensure this is not too tight.

Diagram G

YOUR MEASUREMENTS

Follow the measurement guide carefully, and always check your measurements twice!

20. INSEAM _____ CM

Refer Diagram H

Starting high in the groin, measure the inside of the leg from the crotch to the most prominent part of the ankle bone. Be careful with this measurement as it dictates the length of the suit. Keep the tape close against the skin but not too tight, following the contour of the inner leg.

21. NAVEL TO KNEE _____ CM

Refer Diagram H

Measure down the outside of the leg, beginning in line with the navel and finishing level with the centre of the knee cap. Keep the tape close against the skin but no too tight, following the contour of the body.

22. KNEE TO ANKLE _____ CM

Refer Diagram H

Measure down the outside of the leg, beginning in line with the centre of the knee cap and finishing at the ankle bone. Keep the tape close against the skin but no too tight, following the contour of the body.

23. NAVEL TO ANKLE _____ CM

Refer Diagram H

Measure down the outside of the leg, beginning in line with the navel and finishing at the ankle bone. Keep the tape close against the body but no too tight, following the contour of the body.

24. TOTAL LENGTH _____ CM

Refer Diagram I

Hang head and neck forward and measure from the nape of the neck (end of the cervical vertebra), down the centre of the back and finishing in line with the ankle bone. Keep the tape close against the skin but not too tight, following the contour of the body.

25. HEIGHT _____ CM

Refer Diagram I

Your overall height, stand straight but relaxed.

26. WEIGHT _____ KG

Your current weight in kilograms.

WOMEN'S SUIT ADDITIONAL MEASUREMENTS

27. UNDER BUST _____ CM

Refer Diagram J

Measure the chest circumference, just under the bust, approx 7cm below the nipple line.

28. BRA SIZE _____

To ensure correct fit please specify your bra and cup size. (ie. 12B)
