

## MICRO-10A SENSE BLUETOOTH 4.0

### CAR BATTERY MONITOR

**Works with conductance measurement technology, not just test battery voltage.**

Features:

1. Test all 12V automotive, motorcycle and engine starter lead acid batteries, including ordinary lead acid battery, AGM flat plate battery, AGM spiral battery, and Gel battery, etc.
2. Directly test the battery with loss of electricity, no need to full charge before testing.
3. Testing standards include currently the world's majority of battery standards, CCA, JIS, DIN, IEC, EN, SAE, and GB.
4. Easily track the health of your vehicle battery with this unique Bluetooth enabled smart tracking device. It's easy to install and data is delivered through a free to download iPhone or Android App.

Specification:

Support	All 12V engine starter lead acid car batteries
APP Name	CAR BATTERY MONITOR MICRO-10A
Available	Android: 4.3 and later iPhone: 4S and later iPad: iPad 3 and later
Testing Scope:	CCA 100 – 2000
Operating Voltage:	10-16V
Operating Current:	<10mA
Operating Temperature:	-20 - +70°c
Cable length:	35cm

Advantages:

Simple to operate

You can connect your Smartphone or PAD to car battery with our MICRO-10 box and test the health of battery including the result of CCA, voltage and diagnosis report.

Lower cost

It has much cheaper cost than similar traditional tester.

Connection

Connection via Bluetooth (Android and iOS)

Free update

Download latest APP on Apple store or Google Play (Our App name is LANCOL BATTERY TESTER)
