

Steps to Epoxy Glitter tumbler

This is written for a one color tumbler

Items needed:

- Tumbler - make sure it is clean of oils and dirt.
- Spray paint – choose a paint as close to your glitter color as possible
- Glitter – I recommend starting with fine or ultra fine glitter
- Something to catch the extra glitter in (I use scrapbook paper)
- Epoxy (make sure it is clear when cured and FDA compliant)
- Turner
- Gloves

Steps

1. Spray paint the tumbler and allow to dry
2. Put the tumbler on the turner and start spinning
3. Apply epoxy, you only need a small amount, I use 5ml of each A & B
4. Sprinkle on the glitter, try to get full coverage (reminder to have something under the glitter to catch the extra) continue until the tumbler is fully covered.
5. Let the tumbler cure
6. Tap the tumbler to remove excess glitter then Brush off extra glitter with a paint brush (do this in gentle strokes)
7. Epoxy the tumbler

Optional Steps:

- Add vinyl or waterslide
- Re-epoxy as needed
