

Steps to ink and canned air tumbler

Items needed:

- Prepped Tumbler (this method works best with a epoxied tumbler, I prefer to glitter mine but any method with epoxy works)
- Alcohol Inks
- Small spray bottle with rubbing alcohol in it
- Can of compressed air
- Epoxy
- Clear spray paint

Steps

- Put the tumbler on a level surface
- Spray an area with rubbing alcohol
- Drip the first color on the cup
- Spray the ink with the air (compressed air)
- Add other colors as you go continuing to add alcohol, then ink then air
- Once your happy with the design let dry (alcohol ink dries quickly)
- Spray with sealer (I prefer clear spray paint)
- Epoxy

Optional Steps:

- Add vinyl or waterslide
- Re-epoxy as needed
