0 — 5 mm

Ast/Add Ratio (on Add 2,00)
0,72

Recommended to:

Dedicated for office use with an excellent medium distance providing excellent comfort at the desk. Fully customizable distance (not predefined)

Intermediate Vision:

Low Astigmatism/Addition Ratio allows taking advantage of all the benefit of this design. Customizable distance for intermediate vision area (with no restricted parameters) give the perfect vision according to the client specific environment.

Near Vision:

Standard width of the near vision area, which guarantees the wearer with low additions (< 2.00) to use a single spectacle also for close vision.

Comfort:

The clearness of the design, the low and uniform peripheral astigmatism grant the best comfort for people who want perfect comfort at their working desk.

Adaptation:

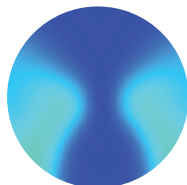

The width of the intermediate vision area, adjustable distance and compensation of vertical and horizontal prism grant the use without difficulties to find the right position.

Personalization:

Personalization available thanks to variable inset and customized addition value (to be settled with exact measure – no restriction at 0,25 diopters step)

Fitting

The Opto+ design logarithm allow to be reproduced on any front lens base (no restriction)
