

## Cafetto® MFC Green Milk Line Cleaner How to Use Guide

### Directions:

1. Ensure the white cap is tightly sealed and slightly loosen the green cap. Gently squeeze the bottle until reservoir measures 50ml, remove the green cap and pour from reservoir.
2. Add 50ml of MFC Green to 1 litre of warm water in a cleaning container. Ensure you replace the green cap and seal tightly after pouring the required dose.
3. Insert milk frother suction tube into solution.
4. Run entire solution through frother.
5. Repeat above procedure with 1 litre of clean water to rinse all the components thoroughly.
6. Do not mix with other chemicals.
