Cayenne® Twin Well 4-Qt Rethermalizers

### DESCRIPTION

Cayenne® Twin Well 4-Qt Rethermalizers are designed to hold 4½ qt. insets to provide greater flexibility with a minimum of space required. All operate on 120V, 15A service. Model 72040 includes two insets and two hinged covers.

### PERFORMANCE CRITERIA

The Cayenne® Twin Well 4-Qt Rethermalizers are designed to take a container of cooked food from a chilled state (below 40.0° F [4.4° C]) through the HACCP “danger zone” of 165° F (73.9° C) in less than 90 minutes. The performance standard is measured using the NSF mixture chilled to 35° F (1.7° C). The electric unit will raise the temperature of this product above 165° F (73.9° C) in less than 90 minutes. The temperature will be maintained above 150° F (65.6° C) when the food product and pan or inset are used with a standard pan or inset cover, the proper water level is maintained in the well, and the food product is stirred regularly.
