How to take your measurements...

Inseam:

In a standing position, measure from your crotch to where you want your pants to end, breaking at the top of the shoe in the front and just above the heel in the back.

Chest:

Take measurement under armpits, around the fullest part of chest and shoulder blades.

Sleeve Measurement:

Bend your elbow and put your hand on your hip. Measure from the center of the back of your neck, along the shoulder and down the elbow to the wrist bone.

Glove / Hand Measurement:

Lay your dominant hand flat, fingers together, palm facing upwards. Wrap the measuring tape around your palm, just below the knuckles, not including the thumb. Measure in inches. Round up to the nearest half inch. We recommend purchasing a half inch larger size than your measurement. Example: if your hand measures 8.5", purchase a glove size 9 or L
