Weld-In   Silverware Pre-Washing System   Weld-In

Application
Recommended For All Customer Operations, (Excluding Most Silverware Chutes) and where unit is not to be moved for operation. Welds into standard dish tables.
            Note: Must be Hard Plumbed & Wired.

Standard Specifications
Structural:
- 304 stainless steel construction with 14 gauge tank, legs, and rim.
- Mounting bracket and mounting studs for control panel included. Enables easy mounting of control panel to wall, dish table or wash tank.
- Minimal footprint.

Electrical:
- 3/4 HP continuous heavy duty (TEFC) motor.
- Pistol grip On/Off mechanical Start/Stop switch with ½" conduit connection.

Plumbing:
- ½" single handle faucet "hot only" included.
- Integrated mixing valve tempers incoming water to dispense water at the appropriate temperature.
- 1 ½" inside diameter ball valve drain provided.
- 11 gallon wash tank capacity.

Operational:
- (2) removable stainless steel wash tank baskets included.
- 600GPM Recirculation wash flow rate.

Standard Specifications (Continued)
Warranty:
- Three years parts and labor warranty.
  (Domestic only)

Specify Desired Electrical Service
Electrical Connection: ½" Conduit connection in PS-50 pistol grip mechanical Start/Stop control box.

☐ 3/4 HP 208/230 Single Phase 5.2/4.8 Full Load Amps.

For international availability contact Power Soak Systems.

Options
☐ Additional wash tank baskets.
   Specify number of baskets here _____.
☐ Splash guard.
