

Goods Customs Duties and Taxes Statement

International shipments are subject to customs duties and taxes imposed on goods when transported across international borders. The Recipient (Importer) of such goods is responsible for paying all related charges.

The Customs Duty Rate is a percentage. This percentage is determined by the total purchased value of the imported goods paid abroad and not based on factors such as quality, size, or weight.

Taxes are fees placed on imported purchased goods which are determined by the importing country's government.

Please contact your local government border agent for further information regarding customs duties and taxes on imported goods into your country.

Thank you for your order!

Sincerely,

ParaTechs Corporation
