

How to install your Eazywallz table wrap?

Before you begin:

Only apply on a flat, smooth and clean surface.

Installation is recommended no longer than 2 weeks after receipt. No warranty will be valid if installation is past 4 weeks.

What you might need:

A trimming tool (Xacto knife).

A rubber or soft squeegee.

A dry cloth.

STEP 1: PREP THE SURFACE

Clean your surface. Be sure it is flat, smooth, dry and free of dust and dirt.

STEP 2: GETTING READY

Unpack and spread out the table wrap on a large table or clean, hard floor, design face up.

Peel off the liner a few inches only across the top of the table wrap. Do not peel off the entire backing at once!

STEP 3: STICK IT!

Stick the top of the table wrap to one end of the table while making sure it is aligned to the edges. Then, using a squeegee or credit card, smooth the top of the mural on to the table. Apply even, firm pressure to ensure complete removal of any bubbles.

Gradually peel the rest of the backing paper off - about 6 inches at a time - and apply the table top wrap.

STEP 4: FINISHING

Bubbling may occur after the door mural as been applied. Simply take a thumbtack or needle and poke the bubbled area a couple of times, then smooth it out with your hands.

Using an x-acto knife, slowly trim the sides of the mural to where your table top ends.
