## We've Got the Solution

Explore products our experts recommend based on your skin type

Oily Skin

Large Pores

Severe Acne

Acne Scars

Clogged Pores

Wants Clearer Skin

### Ultrasonic Skin Spatula

The key to caring for oily skin and clogged pores, is to treat them without causing irritation. The Skin Spatula uses ultrasonic waves to exfoliate and gently remove dead skin and clogged pores. After cleansing, the Skin Spatula will infuse your favorite serums and topicals for better absorption. Use this device 3-5 times per week for best results.

### RejuvadermMD

Oily skin needs exfoliation too. RejuvadermMD deeply exfoliates, unclogs, minimizes pores, and tightens the skin. This device shouldn't be used on active breakouts but will help prevent breakouts from happening. RejuvadermMD has a Sensitive and Normal suction mode that can be adjusted based upon the sensitivity of your skin.

## Tips for Healthier Skin

Follow these simple tips for clearer more youthful skin

### Wash

Wash your face every morning and evening. Keeping skin clean from makeup while you sleep will keep the oil produced at night from getting trapped in your pores. Likewise, washing your skin in the morning will remove excess oil created overnight.

### Moisturize

Moisturize with a non-comedogenic moisturizer (meaning it won't clog pores). Even your oily skin needs moisture because moisturized and oily is 2 very different things.

### Draw

Use a clay mask to draw impurities from your pores and also use clay as a natural, less-harsh alternative for spot treatment.

### Finish

Don't pick! However tempting, picking at pimples will only cause more problems. Scarring and infection to name two. Try to also refrain from touching your face throughout the day to avoid excess oil buildup and irritation.
