Capo - compact, contemporary and designed to celebrate the BEEM Smile or Curli lamps.

These unique LED lamp designs are cleanly presented within full rounded geometric vessels, like a precious specimen in a jar. These hand blown glass domes are available in two tinted transparent shades that produce dynamic reflections as well as transparent Opal, which hides the bulb until illuminated revealing it's ghostly form.

The name Capo derives from mix between cap (as in cover) and apothecary (as in the jars).

SPECIFICATION

System
220-240V / 50Hz

Lamp Base
CP1 E27 ES Beem Curli 8W
