

Let's Make Totals Using Coins 2 : Maths : Year 1 : Spring Term

	Learning Objective	Overview	Assessment Questions	Resources
Lesson 1	To recognise coins.	The children will be shown and use coins from 1p to 50p. They will think about the value of each coin and order them from least to highest value. They will play a variety of games as they become familiar with each coin and its value.	<ul style="list-style-type: none"> • Can children recognise coins? • Do children know the value of each coin? • Can children recognise different ways to make a total value? 	<ul style="list-style-type: none"> • Slides • Coin Cards (Teaching Input only) • Coin Match Cards 1A/1B/1C/1D/1E/1F • Domino Cards 1A/1B (FSD...? activity only) • Photo Sheet
Lesson 2	To exchange coins.	The children will exchange coins so each character has fewer coins to carry in their wallet. They will work independently to exchange the coins by either placing or drawing coins on their worksheet. As an alternative activity the children will match coin sets to totals and create some of their own.	<ul style="list-style-type: none"> • Can children work out the total value of a set of coins? • Can children exchange a set of coins for a smaller set of the same value? • Can children think of more than one way to make a total using coins? 	<ul style="list-style-type: none"> • Slides • Coin Strip (Teaching Input only) • Printable Coins • Wallet Cards 2A/2B/2C • Total Sheets (FSD...? activity only) • Coin Set Cards 2A/2B (FSD...? activity only) • Photo Sheet
Lesson 3	To work out how much change is owed.	The children learn about giving change through a shopping scenario. They will think about the value of the money they start with, then they will subtract the amount they spend from their total. Your class will write number sentences and use the inverse to check their answer.	<ul style="list-style-type: none"> • Can children work out how much change is owed? • Can children write number sentences? • Can children use the inverse to check their workings out? 	<ul style="list-style-type: none"> • Slides • Worksheet 3A/3B/3C • Price Sheet 3A/3B/3C • Game Board 3A/3B (FSD...? activity only) • Character Cards 3A/3B (FSD...? activity only) • Photo Sheet
Lesson 4	To give the correct change.	The children will consolidate their skills practised in lesson 3 as they work out which coins they need to select to give the correct change. They will answer subtraction number sentences as the first step to solving two-part problems.	<ul style="list-style-type: none"> • Can children give change? • Can children subtract money from their total? • Can children explain what they have done? 	<ul style="list-style-type: none"> • Slides • Worksheet 4A/4B/4C • Question Cards 4A/4B (FSD...? activity only) • Change Cards 4A/4B (FSD...? activity only) • Photo Sheet
Lesson 5	To pay and give change.	The children will recognise coins as they pay for items and check how much change they need. In this lesson they will tackle two-part questions as they select the right coins to make a total and work out how much change they need.	<ul style="list-style-type: none"> • Can children understand word problems? • Can children write word problems as number sentences? • Can children pay and give change? 	<ul style="list-style-type: none"> • Slides • Board Game 5A/5B/5C • Character Cards 5A/5B • Money Cards 5A/5B (FSD...? activity only) • Item Cards 5A (FSD...? activity only) • Coin Sheet (Plenary only) • Photo Sheet
