

Science Assessment Grid : Super Scientists : Year 2

<h2 style="margin: 0;">Super Scientists</h2>																			
Group: <input style="width: 100px; border: none; border-bottom: 1px solid white;" type="text"/>		Year: <input style="width: 100px; border: none; border-bottom: 1px solid white;" type="text"/>		Term: <input style="width: 100px; border: none; border-bottom: 1px solid white;" type="text"/>															
Science																			
Lesson 1	Can the children use their own knowledge to make predictions?																		
	Can the children observe patterns?																		
	Can the children talk about what they have found out?																		
Lesson 2	Can the children use their own experiences to make predictions?																		
	Can the children observe patterns?																		
	Can the children talk about what they have found out?																		
Lesson 3	Can the children use their own experiences to make predictions?																		
	Can the children ask questions and make observations?																		
	Can the children talk about what they have found out?																		
Lesson 4	Can the children use their own experiences to make predictions?																		
	Can the children observe patterns?																		
	Can the children talk about what they have found out?																		
Lesson 5	Can the children use their own experiences to make predictions?																		
	Can the children observe patterns?																		
	Can the children talk about what they have found out?																		
Lesson 6	Can the children use their own experiences to make predictions?																		
	Can the children observe patterns?																		
	Can the children talk about what they have found out?																		
Lesson 7	Can the children use their own experiences to make predictions?																		
	Can the children observe patterns?																		
	Can the children talk about what they have found out?
