

Instructions for the Incidence Meter V-2

Thank you for purchasing the Robart Incidence Meter V-2. When using the Robart Incidence Meter V-2, please follow the instructions as noted on our analog meter. However, with the V-2 you will be reading the digital display as noted on your smart phone or digital leveling device.

Smartphone: Search through your app store or google play for a level application. There are many difference smart phone applications that are available free through your device. Each of these will suffice for the purpose of determining incidence. Read and follow the app instruction thoroughly to ensure accurate readings.

Mounting your device: It is vital that your device is mounted flush on the base of your cradle. If the device is not mounted flush you will have inaccurate readings. Use the provided clear rubber straps to hold your digital device in place. Additional rubber straps are available at www.robart.com.

Using the V-2: Follow the incidence meter instructions step by step. Whenever the instructions for the incidence meter call for a reading of the meter, simply read the output on your device and continue as noted on your instructions.

Additional Assistance: Please check out our website, www.robart.com and search for 404E in the search bar in the upper right hand corner. On the 404E page you will find the full instructions and a video on how to use the V-2. Additional support is also available under the support tab on our homepage www.robart.com.
