

The Walktax

- Classic thread meter with superior quality counter
- Measuring accuracy approx. 0.5%
- Durable construction
- Belt clip for carrying
- Simple zero-set on box front
- Change thread with gloves on
- Built-in thread cutter
- Biodegradable cotton thread

The Walktax Thread Meter is a durable and proven reliable distance measuring instrument. The Walktax has a high quality counter that gives accurate readings and lasts for many measuring seasons. With its practical design, precision results and rugged exterior, the Walktax meter is useful in many different work fields such as forestry, construction, survey and gardening.

The Walktax Thread Meter housing is made from strong polycarbonate plastic, drop and shock resistant and with a see-through window for result readings. It has an exterior thread-cutter and zero-set button. The measuring thread is made from biodegradable, 100% cotton and each spool contains 80g/2.8oz (approx.2700m/yds) of thread. The counter accuracy is approx. 0.5 % and results are featured in metric or feet (depending on specified measuring unit on order). The increased distance is shown foot-by-foot, or decimeter-by decimetre. Zero setting is made on the top of the measuring box, without having to open the Walktax box.

With the belt clip, the Walktax can be fastened to the belt. A special attachment for the Walktax in the Haglöf Cruising Belt is also available. To measure, wrap the thread a minimum of four times around the measuring wheel and tie to the starting point. Zero-set the counter. With the Walktax secured in the belt clip, walk to the goal/ending point. Read the distance from start to end in the viewing window. The measuring thread is strong to withstand the strain but will decompose in approximately one to three seasons, depending on weather, terrain and climate.

Wrap the thread four (4) times around the measuring wheel, tie the end of the thread by the starting point, reset the counter and start walking!

The simple and yet smart construction has proven the Walktax meter an indispensable instrument for landscape controls, road construction, gardening and cruising.

Art. no.16-103-1002 Walktax Thread Meter metric. 16-103-1003 Walktax Thread Meter feet. 16-103-1006 Measuring thread in 10-pack.

TECHNICAL SPECIFICATION WALKTAX

Size:	150x75x75mm/6"x3"x3".
Weight:	260g/10,4oz excl thread roll.
Accuracy:	Approx. 0,5% in metric or feet, increments of decimetre or feet.
Thread:	Cotton, biodegradable, approx. 80g per roll.
Exterior:	Polycarbonate plastic housing with belt clip, metallic thread cutter, display window see through plastic.
