

## Quality Expectations for Series 1: White on Black

Our Series 1 keycaps marks the first doubleshot PBT keycaps offered by MONOKEI.

Our keycaps are made through a complex injection moulding process that includes different texture finishing applied on particular surfaces of the cap. As part of the process of plastic injection, the following cosmetic production marks which do not affect functionality may be present:

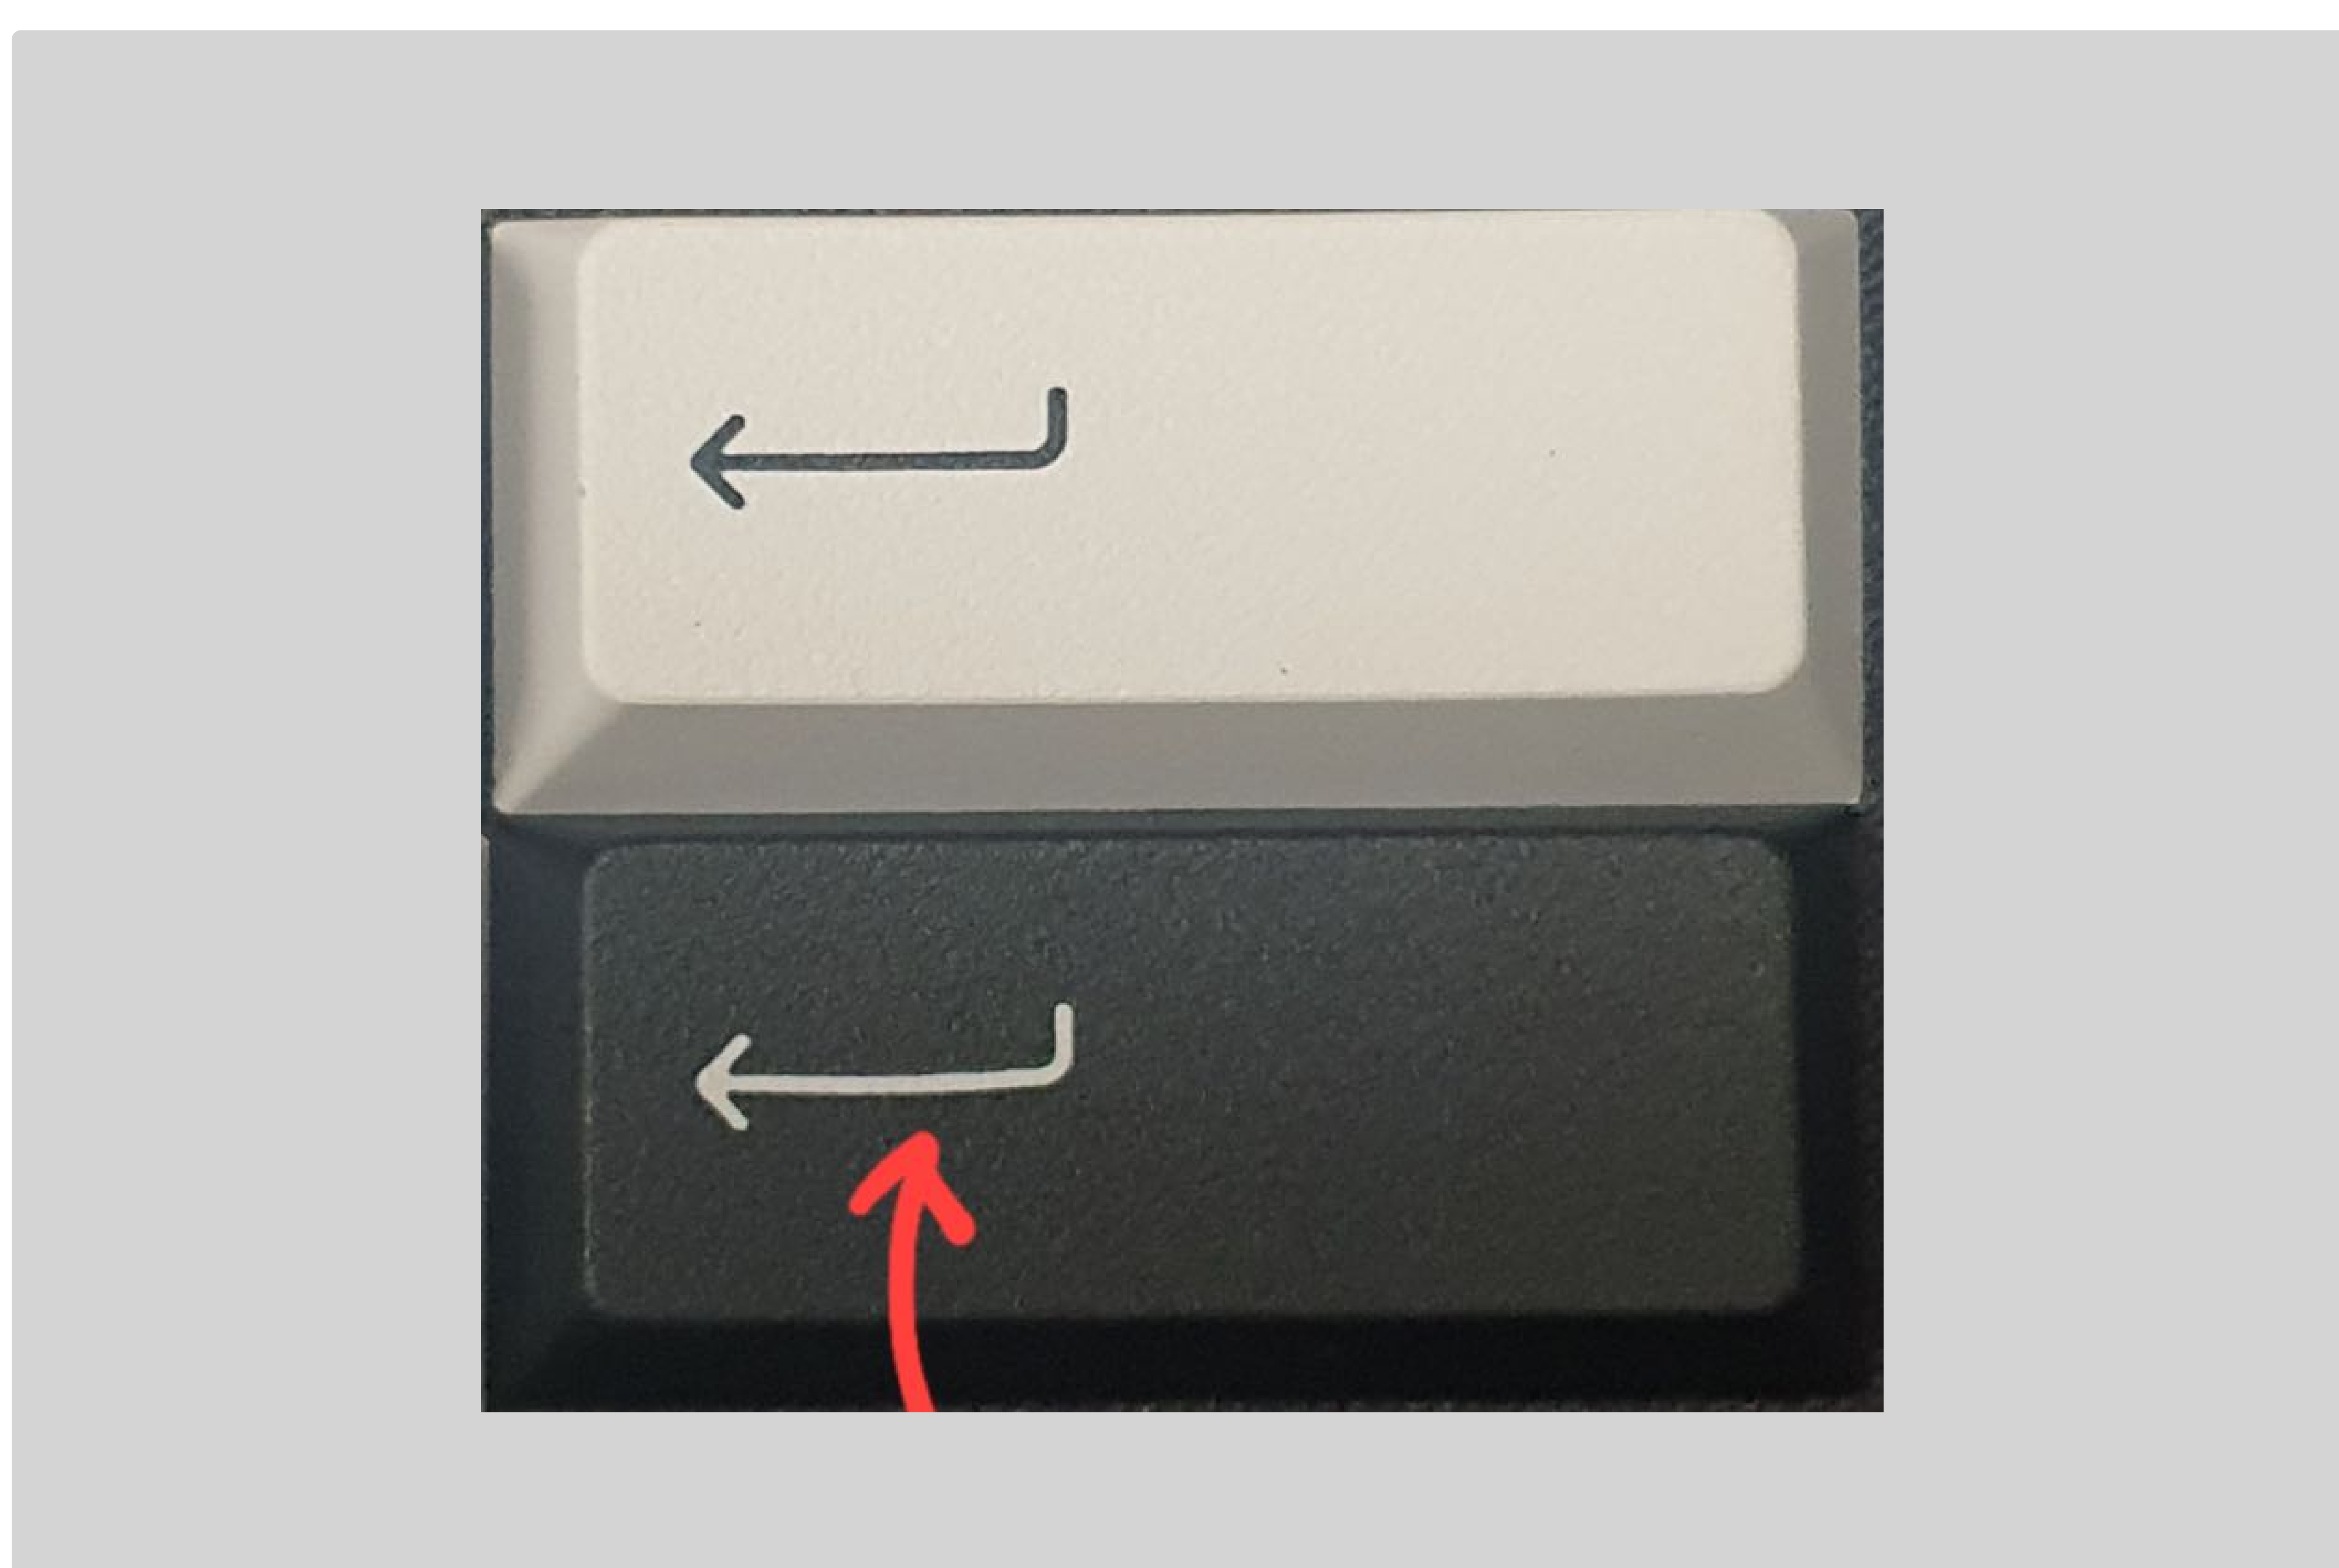

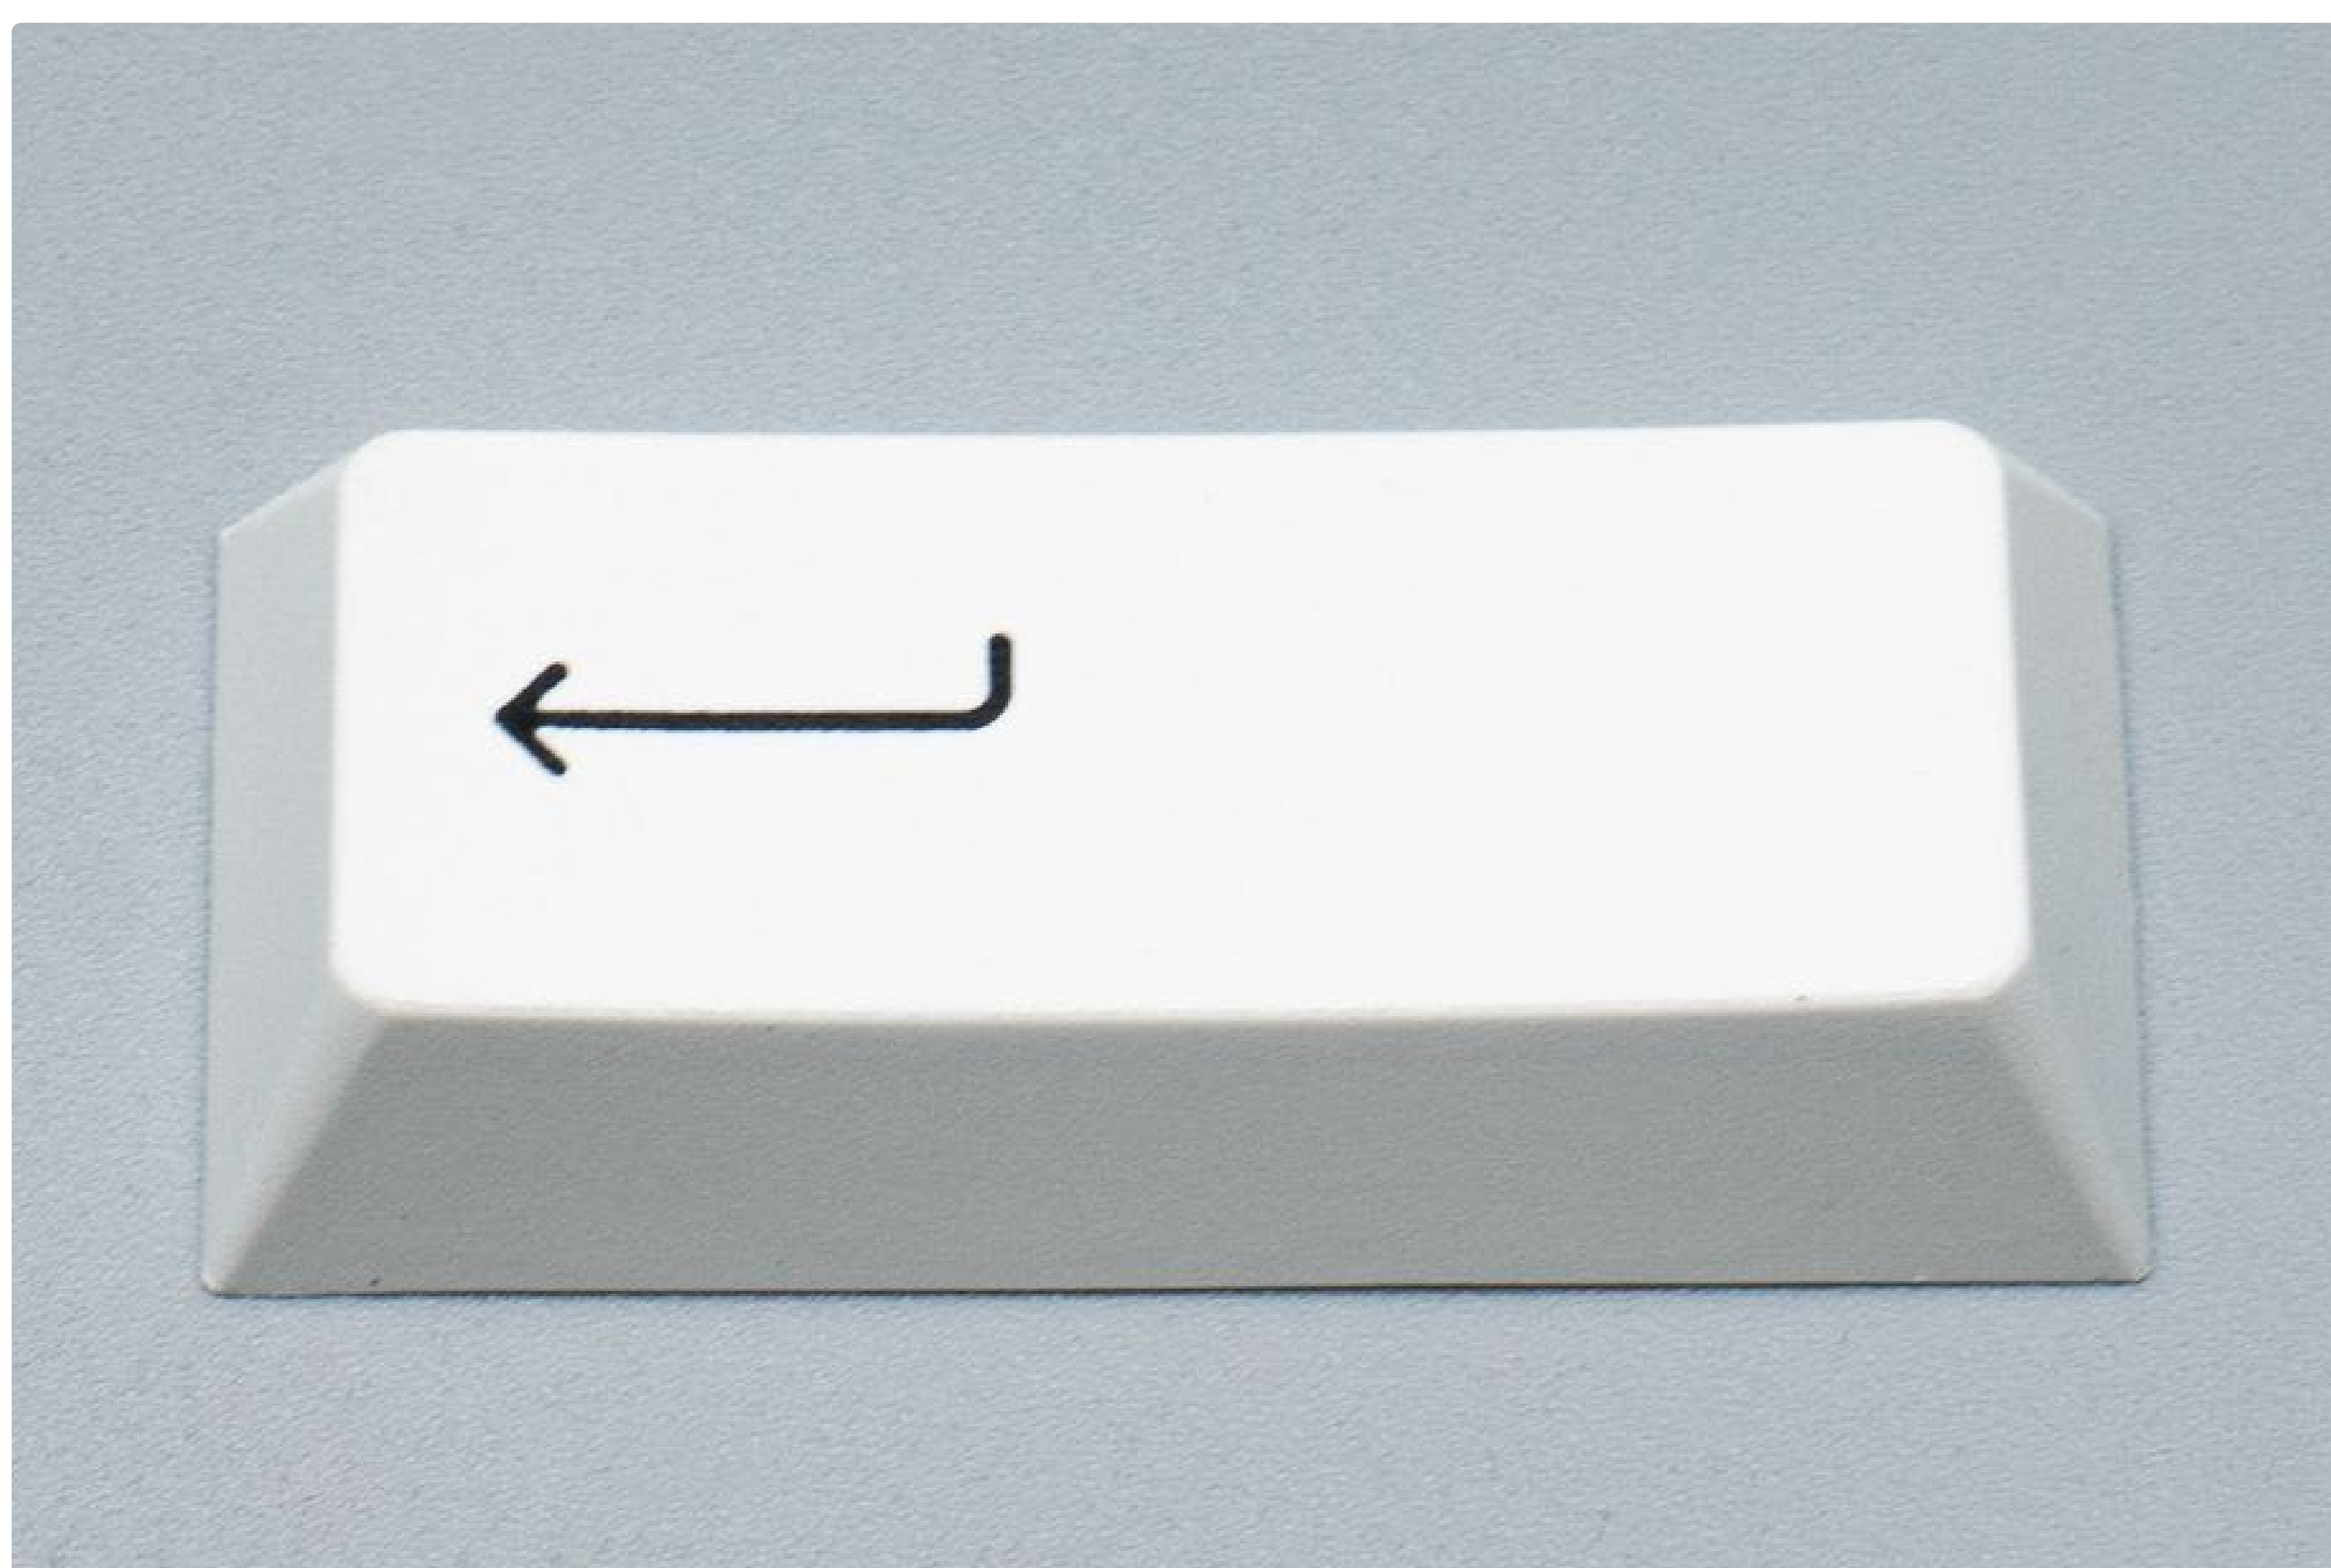

### Sprue marks

These marks do not affect functionality may be present in some of the keycaps.

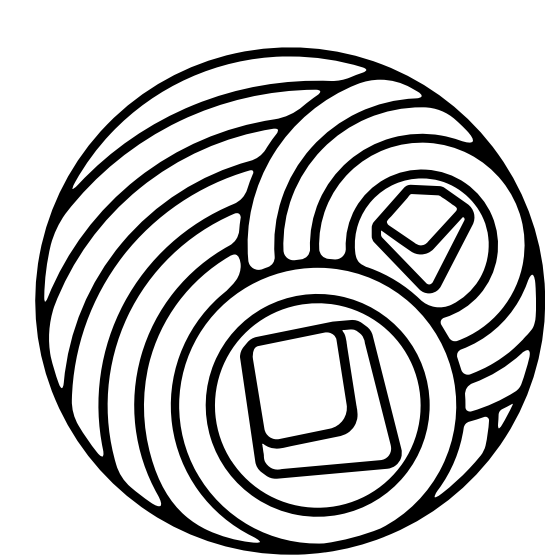

### Injection variation

Slight injection variation may be visible for some legends.

## Silkscreen print

Silkscreen print on the MONOKEI logo may look slightly faded.
