GLOBAL

CUT RESISTANT WORKWEAR

TRADE PRICE LIST 2020 - Edition 1

flexionglobal.com

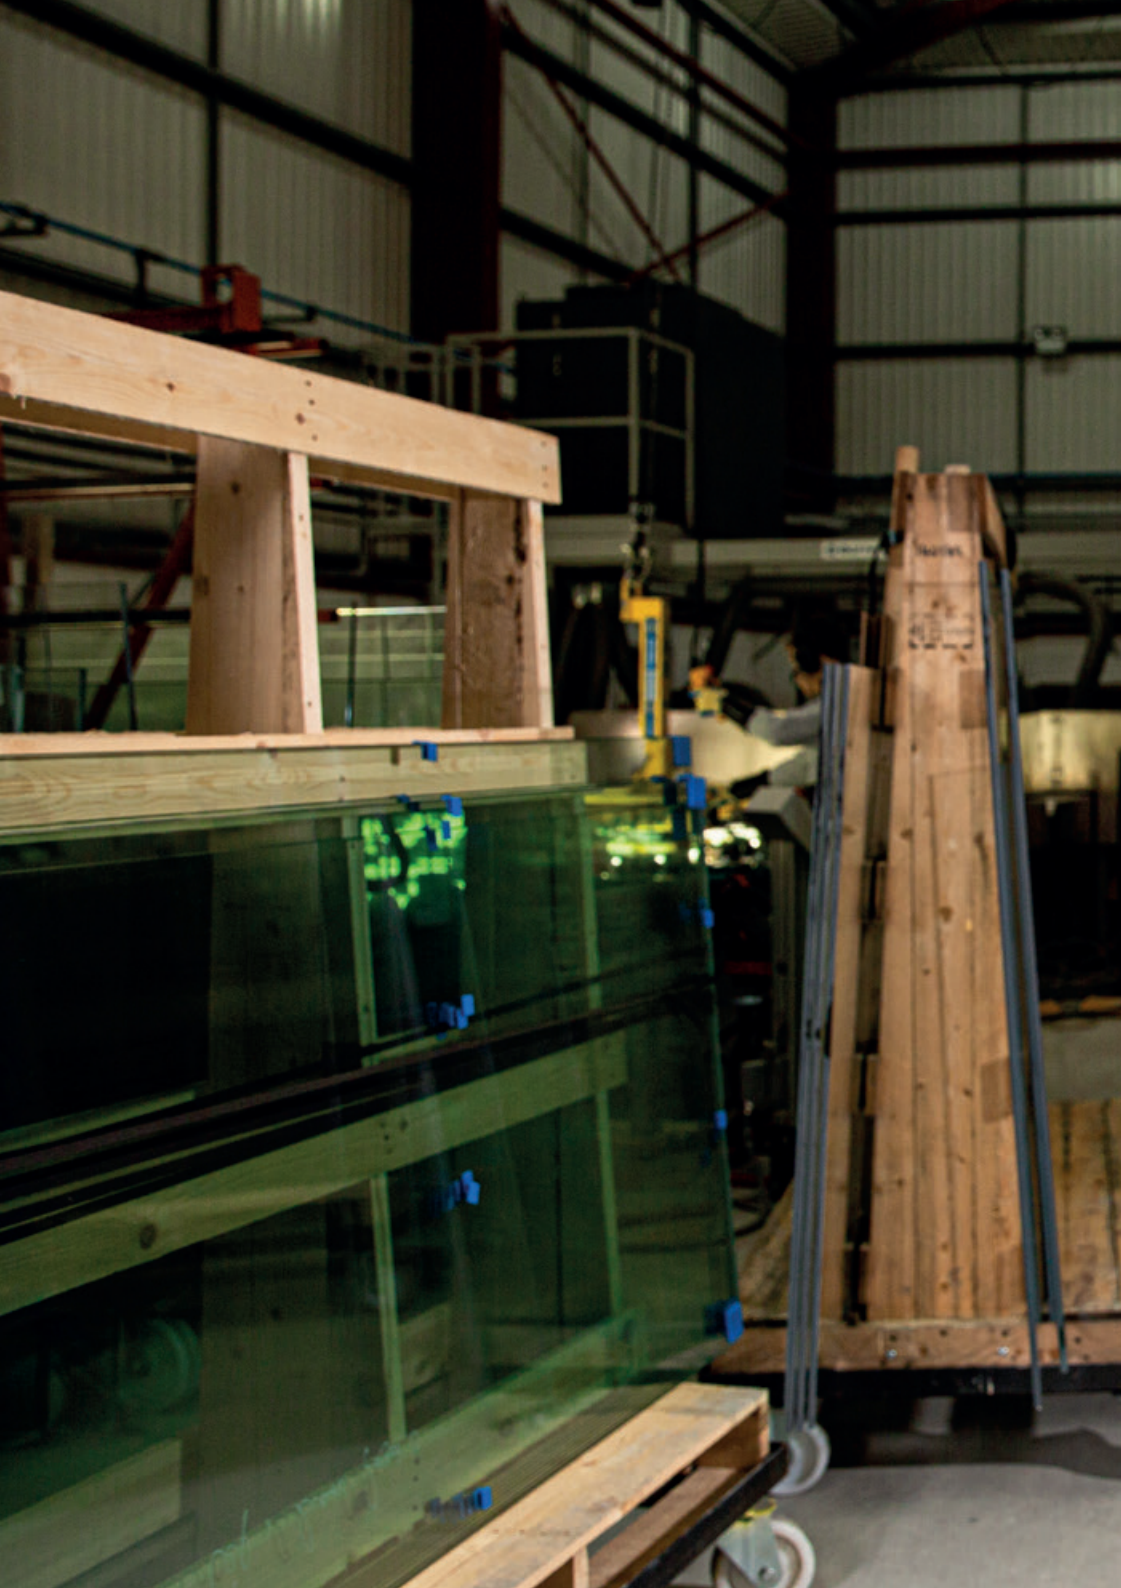

Flexion Global has been developing high strength technical fibres since 1992. These threads were primarily designed for use in the range of chainsaw protective garments produced by Arbortec Forestwear, our sister company. Today they continue to be used, developed and improved in the Flexion Global European manufacturing facility. The products, where required, carry CE marking and EN388:2016. The requirement for PPE (personal protective equipment) has greatly improved the safety of employees over many years.

EN STANDARDS

BS EN 471: HI-VISIBILITY CLOTHING

Hi Vis garment types are grouped into three classes based upon the conspicuity provided, with the classes dictating the minimum quantities of background and retro-reflective materials used.

CLASS 3 - Highest Protection Level of Hi-Vis Clothing

Band of retro-reflective material shall not be less than 50mm wide. Minimum background material 0.80m sq. Minimum retro-reflective material 0.20m sq.

CLASS 2 - Intermediate Protection Level of Hi-Vis Clothing

Band of retro-reflective material shall not be less than 50mm wide. Minimum background material 0.50m sq. Minimum retro-reflective material 0.13m sq.

CLASS 1 - Lowest Protection Level of Hi-Vis Clothing

Band of retro-reflective material shall not be less than 50mm wide. Minimum background material 0.14m sq. Minimum retro-reflective material 0.10m sq.

NB: BS EN 471 standard items must have a Yellow or Orange background. HiVis items of other colours will NOT conform to UK and EU standards for High Visibility clothing

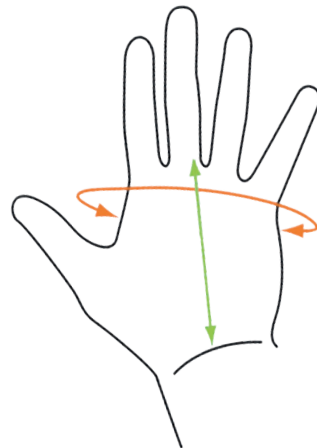

EN388: PROTECTIVE GLOVES AGAINST MECHANICAL RISKS

The EN 388 standard is used to test work gloves for a variety of properties. In brief, these properties are: cut resistance; tear resistance; abrasion resistance; puncture resistance and impact resistance. Gloves complying with EN388:2016 will display a pictogram as shown, with 5 or 6 characters relating to the properties shown below:

- 1st Character: Abrasion resistance (Numeral 1 to 4 with 4 being the best resistance)
- 2nd Character: Blade cut resistance (Numeral 1 to 4 with 4 being the best resistance)
- 3rd Character: Tear resistance (Numeral 1 to 4 with 4 being the best resistance)
- 4th Character: Puncture resistance (Numeral 1 to 4 with 4 being the best resistance)
- 5th Character: Further blade cut resistance test if excessive blunting of blade occurs during 1st test (Letters A to F with F being the best resistance). An X is displayed if this test is not needed.
- 6th Character (Optional): Impact resistance. ("P" if requirements are met)

SIZING

Gloves		
UK	Palm Circumference	Palm Length
7	178mm	90mm
8	203mm	102mm
9	229mm	115mm
10	254mm	127mm
11	279mm	140mm
12	285mm	148mm

TO FIND OUT YOUR GLOVE SIZE:

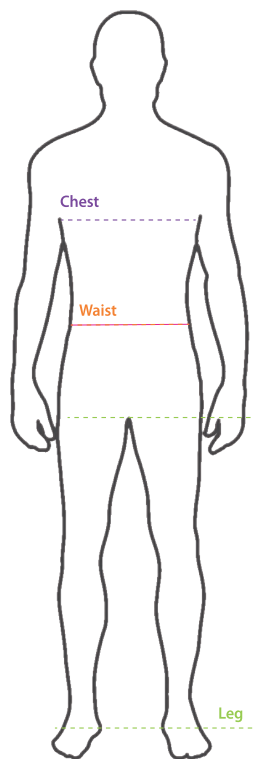

1) Measure around your hand with a tape measure across your palm. 2) Measure length from base of hand to tip of middle finger **NB:** Remember to measure your dominant hand
