TECHNICAL DATA DARANÀ©

Issued on 06/05/2015 - Rev. n. 1 del 05.09.2023

Product features:

Daranà© is NOT a painting and as such it does not appear on the market with the traditional packaging in a jar typical of a decorative product, it is an absolute innovation in the field of decoration that allows you to reproduce a metal effect in liquid form, its innovative structure allows you to decorate any type of surface, walls, ceilings, furniture, furnishing accessories can be enriched with a simple gesture!
DARANÀ© is the combination of science and innovation.

Preparation of the substrate:

We recommend applying Daranà© on substrates treated with Cemento 3D and/or PanareaStone.

Daranà© application method with Decor Finish protective finish:

The Daranà© application method consists of three steps;

1. apply the Decor Fix anchoring promoter primer using a brush and/or a roller on the surface to be decorated, spread the Daranà© foil on the still fresh Decor Fix anchoring promoter primer, for perfect adhesion of the Daranà© foil it should be passed over a cloth or a slightly damp sponge, proceed with this method over the entire surface to be decorated.
2. after an average of 2/3 hours proceed with the removal of the Daranà© foil.
3. apply a single layer of semi-gloss Decor Finish using a brush and taking care to follow the previously created texture, so as to make the surface washable.

Daranà© application method with ProteKto EcoSilan protective finish:

The Daranà© application method consists of three steps;

1. apply the Decor Fix anchoring promoter primer using a brush and/or a roller on the surface to be decorated, spread the Daranà© foil on the still fresh Decor Fix anchoring promoter primer, for perfect adhesion of the Daranà© foil it should be passed over a cloth or a slightly damp sponge, proceed with this method over the entire surface to be decorated.
2. after an average of 2/3 hours proceed with the removal of the Daranà© foil.
3. apply a single layer of ProteKto EcoSilan using a brush and taking care to follow the texture created previously, let the product rest for about 10/15 minutes (times may be longer or shorter depending on the ambient temperature and/or seasonal), and gently clean the surface using a soft cotton cloth.
