Secret

Nature's Bug
Secret

Rosehip
Exfoliator

Dead Sea
Mud Mask

Naturally green.

Linda Lizotte, Founder & CEO

As a practicing nutritionist for over 15 years, I have successfully treated thousands of clients with a wide range of health issues. I am the co-founder of a nutraceutical company. Realizing that what we rub on our skin DOES matter, because we are what we absorb, I saw the need for anti-aging skin products that don't just say they are natural, but actually ARE natural. I was inspired to develop a line of personal care products. These contain no synthetic chemicals and are derived from all-natural plant sources making them unique to the "beautyceutical" industry. We at AMG Naturally Inc. believe "We are what we absorb." Why not get healthy, stay healthy, and age more gracefully?

5 Step Skin Care Kit

Naturally clean.

AMG's Mission Statement:

- Abide by the motto "first do no harm" by ethically providing nutrition for the skin, free of harmful synthetic chemical ingredients to slow down the aging process.
- Be a leader in education in the beautyceuticals industry by maintaining standards that someday all skin and body products will aspire to achieve.
- Be a true partner with the communities with whom we work worldwide with the ultimate goal of sustainably improving the quality of life.

Why Do We Use Moringa Oil?

- Considered the "miracle tree", because all parts (leaves, flowers, fruits, wood and seeds) are sustainably used principally for their pharmacological and nutritional properties.
- Leaves of the tree are so intensely nutrient dense that they are part of the WHO and FAO programs for alleviating hunger worldwide.
- In Ayurveda, the Moringa tree and its component parts are used to treat over 300 ailments.

Moringa Oil Benefits

- Moringa oil is highly penetrating (contains 72% oleic acid, a known absorption enhancer) and drives nutrients deep into the skin because of its similarity to sebum oil. This makes it recognizable by our bodies.
- Extremely rich in antioxidants.
- High in anti-inflammatories (polyphenols, flavonoids).

Why Do We Use Sacha Inchi Oil?

- Contains the highest omega 3 concentration of any plant source.
- Consists of high doses of vitamins A and E as well as skin-soothing amino acids making it a very powerful all-natural antioxidant-boosting ingredient.
- For 3,000 years Sacha Inchi (or Inca Peanut,) known as a superfood, has been sustainably used by inhabitants of the Amazon Rainforest for better total body health and increased endurance.
- Because Sacha Inchi Oil is antibacterial and anti-inflammatory it can improve tough skin conditions such as:
 - Acne
 - Eczema
 - Psoriasis
 - Rosacea
 - Dermatitis
 - Chemo burns
