

MLW200 ROUND TUBE WET FINISHING MACHINE

OVERVIEW:

The MLW200 finishes and polishes round and oval tubes, whether straight or curved, up to Ø205mm using water cooling.

The ML planetary system allows for the best performance on various metals and executes the finishing operation without rotating the tube.

The automatic feeding system transports straight tubes safely through the grinding station, enabling a consistent, high-quality finish.

Low vibration assured even when processing long, large-diameter tubes.

TECHNICAL DATA:

Working capacity (Ømm)	20 – 205
Feeding speed (m/min.)	Manual or 1 – 4
Abrasive belt speed (m/s)	10 – 25
Abrasive belt dimensions (mm)	(2x) 70x1240
Abrasive belt motor (kW)	7.5
Wheel motor (kW)	4
Consumption (A)	28
Dimensions (mm)	1850x2500x1600
Weight (kg)	1500

STANDARD EQUIPMENT:

- Blocking system for wheel rotation
- Pedal for belts opening and wheel unblocking
- Standard filtration system

AVAILABLE ACCESSORIES:

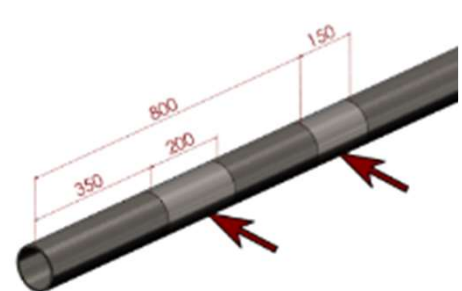

- Touchscreen control on independent unit with program storage
- Automatic feeding system
- Photocells for automatic belts opening
- Automatic filtration system

Optimized for large diameters and long tubes with minimal vibration

Touchscreen on mobile, independent unit (OPTIONAL)

Possibility to save programs and define specific areas to be finished
