

### Deburring and edge-rounding machine

## MiniSpin ME

deburring and edge-rounding machine for removing sharp edges on sheet metal and tubes

- drive motor 0.75kW
- working height/width 150mm
- max. diameter of cylinder/brush <300mm
- spindle can be adjusted vertically and horizontally
- spindle can be angled +/-20° forward and back
- spindle can be tilted sideways
- frequency converter for infinitely variable setting of spindle speed 200 - 800 rpm
- selection of turning direction cw/ccw
- dust extraction connection Ø 80mm
- weight: approx. 100 kg
- operating voltage 110/240 volt, 50/60Hz, single phase
- including grooved hub 180mm diameter/150mm sanding width and first set of SmartFlex sanding strips
- operating manual in English
- conforms with CE
