

**LED INDICATORS:****BATTERY CONNECTS TO POD:**

LEDs TURN ON for 1.5 secs  
(1-3 LEDs will activate depending on power level).

**DURING VAPING:**

1-3 LEDs activate and remain lit for 3 seconds after  
vaping stops.

**VAPING OVER 5 SECONDS:**

1-3 LEDs activate and flash 5 times.

**POWER INDICATIONS WHILE VAPING:**

100% - 3 LEDs  
75% - 2 LEDs  
50% - 1 LED  
25% - 1 LED slowly flashes  
0% - 1 LED flashes 10 x and turns off

**WHILE CHARGING:**

Power level is indicated by 1-3 LEDs that flash  
incrementally as battery level increases. When all  
3 LEDs are on and no longer flashing the battery is fully  
charged. You can vape whilst charging.

**DISCONNECTING THE CHARGER CABLE:**

All 3 LEDs will flash 3 times then go out.

**IN CASE OF SHORT CIRCUIT**

All 3 LEDs will flash 5 times.

**IMPORTANT INFORMATION**

Please read carefully before use to avoid improper  
operation.

1. Please DO NOT try to re-fill your capsule
2. Only use the USB-C charging cable supplied  
by EDGE
3. DO NOT leave the battery unattended or overnight  
while charging and always keep away from  
flammable materials
4. Keep your GO device away from water, damp areas  
and extreme temperatures and store below 25°C
5. Do not drop, deform, bend, crush, puncture,  
incinerate, microwave, shred, paint or insert foreign  
objects into your GO device.
6. GO device should be disposed of and recycled in  
accordance with your local regulations.

**ADDICTIVENESS AND TOXICITY:****SALES ARE PROHIBITED FOR PERSONS UNDER 18 YEARS OF AGE.**

The product contains nicotine, which is a highly  
addictive substance. Use of the product is not  
recommended in non-smokers and young people.  
\*Only applies to capsule

**SAFETY INFORMATION:****CHOKING HAZARD SMALL PARTS  
KEEP OUT OF REACH OF CHILDREN AND PETS****WARNINGS FOR SPECIFIC RISK GROUPS:**

Do not inhale the product if you are allergic to  
nicotine or any of the other ingredients. If you have  
any health problems or any form of irritation when  
using an electronic cigarette, consult a doctor.

The use of the device is not recommended during  
pregnancy or breast-feeding. The use of e-cigarettes  
from an early age can cause serious health problems.  
Nicotine is a very dangerous and sometimes lethal  
substance if used or swallowed by young children.  
Consult a doctor before use during pregnancy.

**CONTRAINDICATIONS:****Seek medical advice before use if any of the below  
conditions apply:**

Hypersensitivity to nicotine or to any of the ingredients,  
pregnancy, lactation, cardiorespiratory failure. Moderate  
to severe liver disease, severe kidney disease, heart  
disease including angina pectoris, heart failure, very  
high blood pressure, heart rhythm or pulse problems,  
patients who have had a recent heart attack or stroke,

(tube between mouth and stomach), inflammation of  
the stomach mucosa (gastritis), stomach ulcer, duodenal  
ulcer, skin problems, long-term neck problems, difficulty  
breathing due to bronchitis, emphysema or asthma,  
pregnancy and breast-feeding.

**POSSIBLE ADVERSE EFFECTS:**

Systemic symptoms that may occur when using  
nicotine containing e-liquid: nausea and vomiting,  
sleep disturbances, headache, chest pain due to  
nicotine toxicity. Mild to moderate toxicity issues:  
gastrointestinal disorder, nausea, vomiting, dizziness,  
headache, tremor, sweating, irregular heart beat or  
tachycardia, pallor and hypertension are common  
symptoms. Serious toxicity issues: convulsions,

dizziness, weakness, bradycardia, hypotension  
and respiratory or muscle paralysis may occur.  
The symptoms may typically occur from 30 minutes to  
2 hours after oral contact. Symptoms may occur  
immediately after inhalation of nicotine.

If you have any of the above symptoms or if a child  
under 12 years of age swallows a product containing  
nicotine, contact your doctor or local hospital  
emergency department or poison centre immediately.
