From: _____
Profession: _____
Patient: _____

SUBJECT: CORESHORTS™ PRO 3.0 Medical Recommendation

The intent of this letter is to provide a Medical referral recommendation for CORESHORTS™.

CORESHORTS™ PRO 3.0 is the only product to support the low back, pelvis and hip as a functional unit. They create pelvic compression and motion control during functional movement. Comparatively, they produce circumferential compression for the pelvis like a sacro-iliac belt while also providing stability for movement of the hips.

- 1 STABILIZES PELVIC RING**
- 2 CONTROLS PELVIS & HIP**
- 3 CREATES TENSION FOR OUTWARD MOTION & ROTATION**

INJURIES
Lower Back
Pelvis & SI Joint
Hip & Groin

RECOVERY
Strains & Sprains
Pelvic & SI Stability
Hip Replacement

PERFORMANCE
Stability
Motion Control
Speed & Power

CORESHORTS™ PRO 3.0 is classified as a **Soft Orthotic Bracing Device** which provides pelvic stability for low back and pelvic conditions such as, lumbo-sacral dysfunction, sacro-iliac joint laxity, osteitis pubis, hernia repair, hip arthritis (THR) and groin injury recovery.

CORESHORTS™ PRO 3.0 is designed to meet medical grade compression ratings.

CORESHORTS™ PRO 3.0 has a compression rating of **20 - 30 mmHg** which is comparable to an adjustable back brace or sacro-iliac joint belt. They are designed to support injury recovery and facilitate a safe return to work and day to day activities in conjunction with a rehab program.

SPECIFIC REASON CORESHORTS™ PRO 3.0 IS BEING RECOMMENDED:

Sincerely: _____

The **SOLUTION** to INJURIES

CORESHORTS™

ACTIVATION SYSTEM

- 1 STABILIZES PELVIC RING
- 2 CONTROLS PELVIS & HIP
- 3 CREATES TENSION FOR OUTWARD MOTION & ROTATION

The only patented design (Core Activation System) utilizes a series of strategically angled elastics to produce the first anatomically correct compression short to connect the lower back, pelvis and hip to **IMPROVE CORE FUNCTION!**

3 VERSIONS TO MEET YOUR STABILITY NEEDS:

PRO 3.0 "Maximal" Functional Stability

Maximal support for the low back, pelvis, hip, and groin areas while optimizing motion control.

Patented "X" Core Activation System featuring a longitudinal stretch with 1.2 mm engineered stretch fabric that produces 80% more directional & functional stability than a regular compression short - complete dynamic stability!

Medical compression rating 20 - 30 mm Hg.

"3.0 Maximal Prevention, Performance & Recovery"

PRO 2.0 "Specific" Functional Stability

Specific support for the low back, pelvis, hip, and groin areas while optimizing motion control. Recommended for those who need to bolster their pelvic stability and motion control.

Patented "X" Core Activation System featuring a two way longitudinal stretch with .80 mm engineered stretch fabric that produces 60% more directional & functional stability than a regular compression short.

"2.0 More Compression more Support"

PRO 1.0 "Global" Functional Stability

Global support for the low back, pelvis, hip, and groin areas while allowing for maximum motion. Recommended for all ages and activity levels.

Patented "X" Core Activation System featuring a bolstered 4 way 230 g stretch fabric. 40% more directional & functional stability than a regular compression short.

"1.0 A Compression Short with a Purpose"

CORESHORTS™
ACTIVATION SYSTEM

- 1 STABILIZES PELVIC RING
- 2 CONTROLS PELVIS & HIP
- 3 CREATES TENSION FOR OUTWARD MOTION & ROTATION

The original **CORESHORTS™** are back!

After partnering with **Under Armour** for a number of years, **Coretection** is excited to be back in the game to bring you the **Original CORESHORTS™**.

The purpose and design of **CORESHORTS™** is what differentiates them from regular compression shorts and makes them **UNIQUE!**

The SOLUTION to INJURIES: **CORESHORTS™**

PREVENTION ■ PROTECTION ■ PERFORMANCE

CORESHORTS™ patented design (**Core Activation System**) utilizes a series of strategically angled elastics to produce the first anatomically correct compression short to connect the lower back, pelvis and hip to **IMPROVE CORE FUNCTION!**

- Elastics cross from the hip to the opposite mid thigh, front, and back
- Waist area is circumferential providing **pelvic compression**
- Tension is created for both **unidirectional** and **multidirectional movements**

The **SHORTS** for Sports!

CORESHORTS™ offer core protection and reduce strains & sprains. Their **UNIQUE** patented design supports the core anatomy and enhances functional movements.

The key to an efficient recovery is an early accurate diagnosis, a progressive rehabilitation program, and sport specific retraining.

CORESHORTS™ were designed to aid in the recovery of core injuries by providing anatomical and functional support to the "core" area, including:

- Lower abdominal sprain
- Hip flexor/quadriceps strain
- Hernia / sports hernia
- Hip rotator strain
- Sacro-iliac joint sprain
- Hamstring strain
- Hip ligament sprain
- Lumbo-sacral sprain
- Adductor strain (groin)
- Osteitis-pubis

Labourer Firefighter
Military Skiing
Baseball Hockey
Fitness, Crossfit Lacrosse
Football
Golfing Police Basketball
Rugby Hiking
Running

Pelvic & Groin injuries are increasing in both recreational and professional athletics!

CORESHORTS™ ADVANTAGES

- Single garment
- Built-in "hip spica" groin protection
- Structural support to improve pelvic, hip, and lower back stability
- Functional support to assist lower abdominal, hip flexor, quadriceps, and hamstring control
- Wicking material for comfort & moisture management
- Antibacterial and antimicrobial protection
- Stretch gusset for comfort and fit
- Latex and rubber free

CORESHORTS™ APPLICATIONS

- Motion Control**
- Sports, work, fitness, post accident, post partum
- Injury Recovery**
- Lower back, sacro-iliac joint, osteitis pubis, groin injuries, muscle strains, ligament sprain
 - Post surgical: hernia & hip replacement

- Injury Prevention**
- Reduces muscle vibration
 - Improves heat retention while providing the latest in moisture management
 - Assists in directional and multidirectional movement control

CORESHORTS™ is the **Solution!**
