### Specifications

Voltage:	12V DC	Lumen (±5%):	Warm White 3000K - 200lm White 5000K - 205lm	Dimmable:	No
Power:	3.6W	Beam Angle:	90°	Lifespan:	50,000hrs
CRI:	≥80	CCT:	3000K - 5000K		

### Technical Information:

Introducing the ASTRA LED cabinet lighting series. The ASTRA is an alternative to the traditional halogen light sources. The ASTRA features a high output 3W COB LED to offer superior performance and light over the working area whilst only consuming a total 3.6W of energy. The ASTRA offers two mounting options to cover a wide range of applications. These include recessed mounting or surface mounting. Smooth even lighting is provided from a single light point and frosted lens.

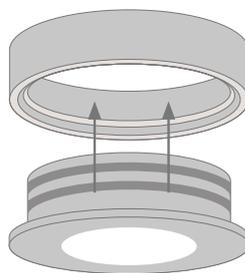

### Attention:

The ASTRA cabinet light is designed to work on constant voltage 12V DC LED drivers. Please do not connect to traditional power supplies such as magnetic / electronic AC transformers used for halogen lighting products. All electrical work must be carried out by a licenced electrician (Please wire in parallel).

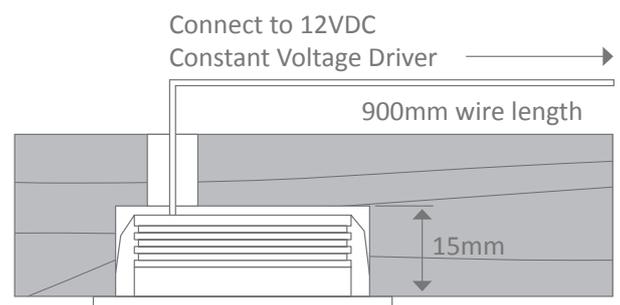

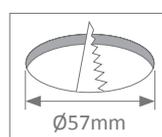

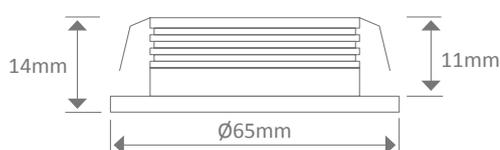

Please select the appropriate LED driver to suit the total amount of fixtures on a circuit. Please use the table below for selection. Domus Lighting offers higher wattage LED drivers to suit larger applications. Please contact our head office for advice or your local place of purchase.
