Advanced Facials

DermaPen Skin Treatment

DermaPen is a micro-needling skin treatment which promotes scarless healing and natural collagen production to improve the appearance of scars, acne, wrinkles, pigmentation and to rejuvenate the skin.

JetPlasma (New and Latest technology)

Pain Free, No Numbing, Zero Downtime, Immediate Results, Endless treatments. Cold Plasma and Ozone combination. There is NO other skin tightening device on the market that can reach the subcutaneous tissue like this device. For scarring, fine lines, stretch marks, HyperPigmentation.

Laser Skin Rejuvenation Facial

Intense Pulsed Light or better known as IPL is a skin treatment that uses lasers, intense pulsed light, or photo-dynamic therapy to treat skin conditions and remove effects of photo-aging such as wrinkles, spots, and certain pigmentation problems

Essel - Xpert Chemical Peel

This involves the application of a chemical solution to the skin, designed to speed up cell turnover and renewal. The surface cells are targeted, and following treatment, your skin may peel – shedding the dull surface layer and revealing fresh new cells. This is a non-evasive treatment and you can return to work the next day.
