About Us

Established in 1991, Fletchers Supplies is your leading supplier of cleaning, packaging and hospitality requirements. Based in Wangaratta we supply throughout North East Victoria and Southern New South Wales.

Fletchers Supplies stock and distribute an extensive range of cleaning chemicals, cleaning equipment, food packaging and containers, hand care products, janitorial requirements, odour control products, glassware, crockery, cutlery, commercial cooking equipment and other commercial catering needs.

Here at Fletchers Supplies, we pride ourselves on the relationships we cultivate with our clients and suppliers. We believe in delivering a personalised, end-to-end service, which is why our knowledgeable team is always available to speak with you face to face. Whether it is our dedicated client representatives who visit you during the week, our skilled installers, or our reliable delivery drivers, we are here to assist you every step of the way.

We supply hotels, motels, restaurants, schools, bakeries, wineries, a wide range of other businesses and cleaning contractors who service the region. Our service area covers the entire North East of Victoria and southern New South Wales including regional centres such as Cobram, Yarrowonga, Corowa, Rutherglen, Albury, Wodonga, Tallangatta, Yackandandah, Beechworth, Myrtleford, Bright, Benalla, Mansfield, Eildon, Alexandra, Marysville, Euroa, Seymour, Nagambie, Kilmore and the Alpine and Snowy Mountains.

See you soon

Bioplastic

Made with Ingeo™, an ingenious bioplastic made from rapidly renewable plant-based resources – not fossil fuels. The below PLA lids are certified compostable in an industrial facility. They are not recyclable with non-compostable plastics.

BioCane

Made from reclaimed and rapidly renewable sugarcane pulp, these lids are certified home and industrially compostable and will create nutrient-rich compost with no toxic residue.

KNOW YOUR BIOPAK PACKAGING SYMBOLS

Disposal

Compostable

These symbols identify packaging that is independently certified as either home or industrially compostable. Industrially compostable certified products will disintegrate within 84 days and biodegrade within 180 days in industrial composting conditions. Certified home compostable products will biodegrade within 365 days in home composting conditions. We list the certification standards and our unique certificate number.

Recyclable

This packaging can be recycled through kerbside recycling collection – just make sure it's rinsed clean and free from grease and oil.

Product Materials

Responsibly Sourced Paper and Wood

We only use raw materials from responsibly managed plantations, including FSC™ certified plantations, to ensure our forests are protected forever.

Bioplastic/ Polylactic Acid (PLA)

Our plant-based bioplastic packaging is either home or industrially compostable and has a lower carbon footprint than conventional plastic packaging. It is not recyclable with conventional non-compostable plastics.

Sugarcane Fibre/ Bagasse

Our sugarcane fibre packaging is made from sugarcane fibre (also known as bagasse), a by-product of the sugar refining industry. Sugarcane fibre packaging can be recycled in the cardboard recycling stream if not contaminated with food.

Conventional Plastic

We're in the process of phasing out all non-compostable plastic items. This type of plastic is well-marked so you can identify whether they're kerbside recyclable – they are **not** compostable.

Product Features

Customisable

Our experienced design team is here to assist with custom branding or bespoke mould sugarcane fibre solutions.

Hot or Cold Use

Our hot food friendly packaging is grease-proof and sturdy, and will retain its structural integrity whilst holding hot food. Our clear bioplastic cups and bowls are cold use only.

Microwave and Oven Safe

We have noted which packaging is microwave and/or oven safe. Our sugarcane takeaway range can go in the oven at temperatures of up to 220°C for a maximum duration of 20 minutes.

Freezer Safe

This symbol means the packaging is safe to use in the freezer, however, the structural integrity will vary depending on the food contained when frozen and thawed. We can supply samples for you to conduct testing.
