INSTALLATION INSTRUCTIONS FOR CIRCLINE FIXTURES

READ INSTRUCTIONS AND REVIEW ALL DIAGRAMS BEFORE INSTALLING FIXTURE

WARNING:

Handle fixture with care to avoid possible cuts or abrasions from exposed edges. We suggest you use work gloves when installing the fixture.

Turn off power at circuit breaker or fuse box before installation.

Use this fixture only on a 120 volt 60 Hz fused circuit.

To help prevent the possibility of an electrical shock, it is recommended that a sturdy wooden ladder and rubber soled shoes be used during installation.

Be certain that the wire nuts are tight and no bare wires are exposed outside of the wire nuts.

INSTALLATION:

1. Attach gem bar to box in ceiling.
2. Screw steel nipple into gem bar (make sure that it sticks out long enough for the fixture to go on and the cap to cover it).
3. Screw on hex nut to secure the steel nipple in place.
4. Attach wires. Black (power) to black, white (neutral) to white. If ground is supplied, attach to green screw on the gem bar.
5. Mount Fixture: Attach knurled cap to secure the fixture in place.
