TYPE-C (INPUT)

***The information in this instruction manual may differ depending on the software version.**

Function Introduction

- **Power on:** Press the power button for 3 seconds.
- **Power off:** Press the power button for 6 seconds.
- **Reset:** Press the power button for 14 seconds.

Technical Specification

Model: OTRMT21V1.mei

Box content: Device, User Manual, Type-C cable, SIM removal tool

- Size: 126 X 68 X 12.1 mm
- Screen Size: 2.4 inch
- LTE FDD: B1/2/3/4/5/7/8/9/12/13/17/18/19/20/25/26/28/66
- LTE TDD: B34/38/39/40/41
- WCDMA: B1/2/4/5/6/8/9/19
- GSM: 850/900/1800/1900
- Wi-Fi: 2.4G; 802.11 b/g/n
- SIM Slot: 1 Nano SIM
- USB Port: Type-C (input)
- Battery Capacity: 3000mAh/ 3.8V
- Power Input: 5V-2A

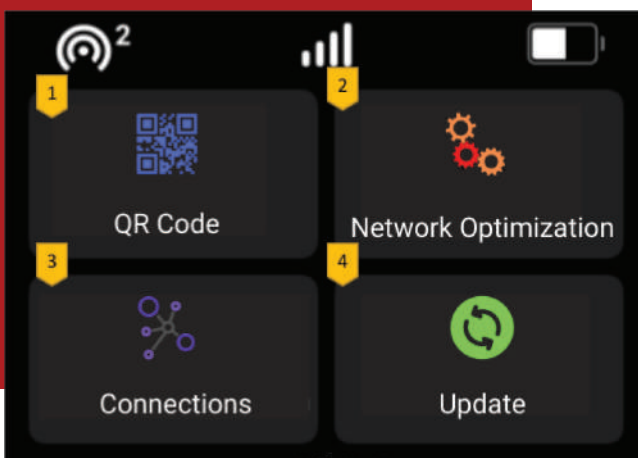

Quick Start Guide

- **To Power on:** Press and hold the power  button for 3 seconds.
- Select your language.
- Allow the device to complete the connection process.
- Scroll to the right and find your device information such as the SSID and Password.
- Use this information to connect to your Titan Hotspot network.

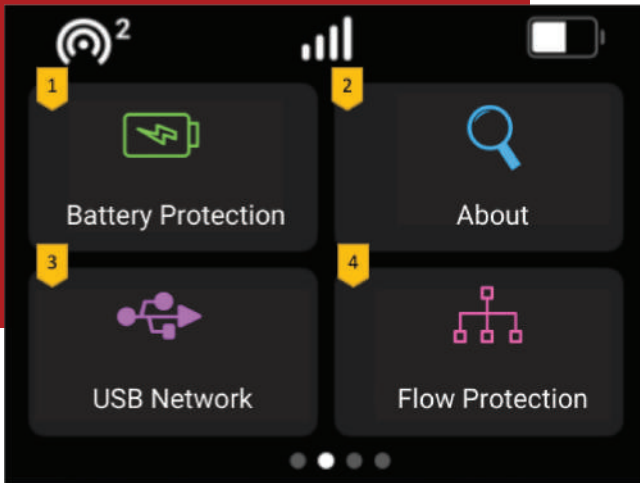

Display-Icon (Subject to actual latest software):

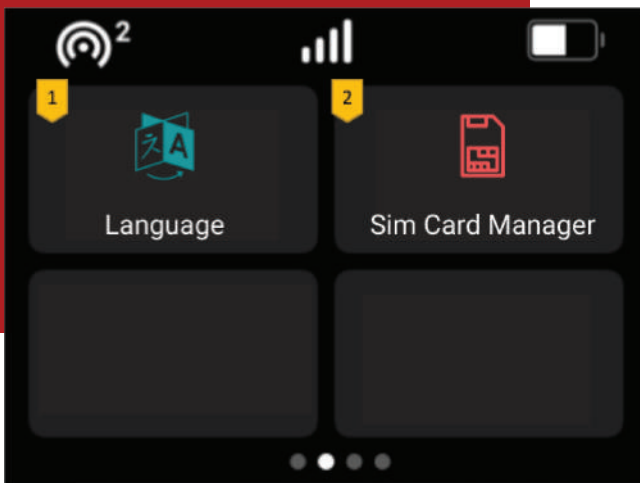

- Number of device connections
- Signal strength
- Battery level
- Data Usage

- **QR Code:** For downloading the My OTR Mobile App
- **Network optimization:** Use this to connect to the best Network
- **Connections:** Use this to connect/ disconnect devices on your network
- **Update:** You can update the software version for best performance

- **Battery Protection:** Intelligent protection of battery life when turned on.
- **About:** You can confirm the device information and restore factory settings.
- **USB Network:** You can connect to the internet by connecting the Titan to a Windows PC with a USB cable.
*This function is not supported by Mac.
- **Flow Protection:** This is data management, use this function to prevent massive data usage due to automatic app download and update and automatic sync of cloud apps.

- **Language settings:** Use this to select your language.
- **Sim Card Manager:** If you insert your own physical SIM card into the device, you can connect to that internet instead of the internet provided by the VSIM.

- Local SIM is supported by Titan, only insert Nano-SIM card. Please turn off the device first if you want to insert/pull out the SIM card. Use a safety pin to pull out the SIM cards as shown in the picture above.
- Use the power button to restart the device.

Warning

Specific Absorption Rate (SAR) refers to the rate at which the body absorbs RF energy. The

SAR limit is 1.6 watts per kilogram in countries that set the limit averaged over 1 gram of tissue and 2.0 watts per kilogram in countries that set the limit averaged over 10 grams of tissue. During testing, the device is set to their highest transmission levels in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value.

EU Regulatory conformance

The device complies with RF specifications and when used with an accessory that contains no metal and that positions the device are a minimum of 0.5 cm from the body.

The SAR limit adopted is 2.0W/kg averaged over 10 grams of tissue. The highest SAR value reported for the device when properly worn on the body is 1.250 W/Kg complies with the limit. Hereby, USA OTRMOBILE declares that this device is in compliance with the essential requirements and other relevant provisions of Directive (RED) 2014/53/EU.

FCC Regulatory conformance

For body-worn operation, the device complies with FCC RF exposure guidelines and when used with an accessory that contains no metal and that positions the device at a minimum of 1.0 cm from the body.

The SAR limit adopted by the FCC is 1.6W/kg averaged over 1 gram of tissue. The highest SAR value reported for the device when properly worn on the body is 1.383 W/Kg complies with the limit.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause.

Undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and complies with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur during installation. If the device does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is suggested to try to correct the interference by the following measures:

- Reorient or relocate the receiving antenna.
- Increase the distance between the equipment and receiver.
- Connect the equipment to an outlet on a different circuit to the receiver.
- Consult the manufacturer or an experienced radio/TV technician for help.

Information on the disposal and recycling of the device

This symbol (with or without a solid bar) on the device, batteries (if included), and/or the packaging, indicates that the device and its electrical accessories (for example, a headset, adapter, or cable) and batteries should not be disposed of as household garbage. These items should not be disposed of as unsorted municipal

waste and should be taken to a certified collection point for recycling or proper disposal. For detailed information about device or battery recycling, contact your local city office, household waste disposal service, or retail store. Disposal of the device and batteries (if included) is subject to WEEE.

Directive Recast (Directive 2012/19/EU) and Battery Directive (Directive 2006/66/EC). The purpose of separating WEEE and batteries from other waste is to minimize the potential environmental impacts and human health risks of any hazardous substances that may be present. Do not disassemble or modify, do not short-circuit, do not burn, do not expose to high temperature, do not soak. Do not squeeze or bump the battery. Do not continue to use if serious damage appears Contact USA
