

Bullet Catcher, short chamber 4-2002 (1150052)

Lightning Powder Bullet Catcher is designed to assist the firearms examiner with the collection of test rounds from weapons used for forensic comparisons. The Bullet Catcher was developed in Russia and brought to the United States by Lightning Powder.

- Special ballistic fibers capture projectile without damage
- Does not require "powdering down" to collect hollow point munitions
- Three chamber doors for ease of gathering of projectiles

Specifications:
