

NTK | General Narcotics Test Kit

The SwabTek General Narcotics Test Kit is designed to screen for a broad spectrum of narcotics.

Since this test screens for a wide array of targets, it can be used as a preliminary screen in conjunction with more targeted field tests (amphetamines, cocaine, etc.), or as a standalone.

In addition, the broad scope of this test makes it a useful tool for enforcing zero-tolerance drug policy in environments such as corrections, private workplaces, and schools.

Classes of Narcotics Screened for:

1. **Common Street Drugs** (amphetamines, synthetic opioids, cocaine, LSD, benzodiazepines, etc.)
2. **Illicit Drug Precursors** (primary, secondary and tertiary amines & alkaloids)
3. **Synthetic Cannabinoids** (Indoles, Pyrroles, Phenols – commonly referred to as **K2** or **Spice**)
