

Warranty Statement

RFMAX Power Mapper & Meter

The advertised warranty period for this product is two years from purchase. However, RFMAX has a no-quibble policy for customers and distributors, no matter what the fault or damage.

No matter how, or why the meter was damaged, we will replace or fix the meter free of charge. This applies within the warranty period and at our discretion, outside the warranty period. This applies to the current V7 product only. If the customer has a broken V5 or an earlier version, we will repair the meter or offer a V7 at a 22% discount.

The broken meter must be returned in its entirety, no matter how badly damaged. We may make a charge for missing parts such as the antenna etc.

In alignment with new repair regulations in Europe and the UK, the V7 has access to screws so a competent technician can repair the product. If the customer is happy to attempt the repair, we will send the components free of charge as soon as they are available.
