B	1" TEES	4
C	8" PIPE	4
D	18" PIPE	4
E	16" PIPE	2

ALSO INCLUDED:

3/4" SCREWS 16

HOW TO PREVENT PIPE CORROSION

PIPE DECOR industrial-grade black pipes and fittings are coated with a rust-preventive oil during manufacturing. For best results, **SEAL THE PIPES TO AVOID ANY RUSTING** after cleaning the kit.

CLEAN AND SEAL INSTRUCTIONS:

CLEAN: Recommended supplies: regular degreasing dish soap, washcloths, gloves (optional)
1. Wash your pipes and fittings with warm water and dish soap until the oil is completely removed.
2. Wipe the pipes with a dry washcloth and wait until the pipes are completely dry.

IMPORTANT: THE PIPES MUST BE COMPLETELY DRY BEFORE YOU START THE SEALING PROCESS.

SEAL:

IF USING POLYURETHANE SPRAY: Spray each dry pipe and fitting with a polyurethane matte or satin finishing spray and let it dry before assembling the kit.

IF USING FINISHING WAX: Coat each dry pipe with a finishing wax. Wait for 20 minutes, then polish the pipe with a dry washcloth by wiping them down. Faster wiping will result in a shinier finish.
