

ACCESSIBILITY RECOMMENDATIONS

We hope that as many people as possible can enjoy Danger Danger, so we've put together some handy accessibility recommendations for you.

ACCESSIBLE GAME MODES:

TRICKY TEN STACK

You can only have up to 10 Stacks on the table (the starting 6 Stacks + up to 4 new Stacks created during the round). Setup works the same as usual. If you draw a New Stack card and want to start a new Stack, you can only play it in one of these positions:

If all 4 positions are filled, you must play the card following the normal rules by playing it on top of another Stack with a number 1 higher or 1 lower than your card.

SILENT STACKING

All players must play in complete silence. You can gesture, point, or tap to communicate with your teammates, but you can't speak or make any other verbal noises.

FOR PLAYERS WITH MOTOR/MOBILITY CONDITIONS:

- Assign one player as the Card Player for your team. All teammates should still communicate with each other to find the best place to play cards, but only the Card Player will draw cards and place them on the Stacks
- Play the **Tricky Ten Stack** game mode to make it easier to play on all of the Stacks. Before starting the round, make sure all players can reach the 4 New Stack positions.

FOR PLAYERS WITH VISUAL PROCESSING CONDITIONS:

- Play the **Tricky Ten Stack** game mode to reduce the total number of Stacks on the table at any time.

FOR PLAYERS WITH AUDITORY PROCESSING CONDITIONS:

- Play the **Silent Stacking** game mode to focus entirely on visual communication and eliminate the chaotic verbal communication of the core game.
- When setting the timer on your phone, consider enabling vibration or using a flashing light timer.
