# The Ruben

**S**urround yourself with luxury and comfort. Sink into Ruben's extra deep feather wrapped soft seating and feather and fibre-filled plush back cushions. all nestled into a sturdily built solid plywood tuxedo style frame.

Ruben's Canadian-made CertiPUR soft foam seats are wrapped in leather and fiber providing you with a 10" seat height for maximum comfort. The back cushions are plushly filled with feather and fibre combination creating a gradual compression that makes you feel like you're landing into a cloud.

All of our cushions are supported with a state of the art mesh suspension seat that acts like a trampoline of support and the back has an Italian webbing system that supports the generously sized back cushions.

In addition to this superior level of comfort, the Ruben comes with four feather filled toss pillows. Choose from hundreds of fabrics that show off your unique and individual flair that hold up to your families busy lifestyle. Our meticulous sewing details and impeccable upholstery work are mastered by our skilled craftsmen, ensuring that every sofa is made to perfection. The solid Baltic birch plywood frame construction is precision cut ensuring that it is sturdily built and will last for years to come. Our sofas are Canadian-made, so you can trust that they are built to last and made with the best materials available today. Visit our website under the Ruben collection to view all possible sofa and sectional configurations to customize this perfectly for your home.

## CERTIPUR FOAMS

Van Gogh designs is proud to use Canadian made foams in all of our products.

\*Eternal Foam is a high performance, high resilience product designed to last.

It is manufactured with a high support factor, advanced air flow, and tight cell structure which means it firms up rapidly as it is compressed providing greater long term support. These factors also allow the foam to rapidly spring back into original form.

\*Eternal Foam is CertiPUR-US certified, low VOC (volatile organic compounds) and is made without:

- Ozone depleters
- Flame retardants
- Mercury, lead and other heavy metals
- Formaldehyde

Our collections are manufactured in standard High Resiliency Soft foam at a 2.3lb density. Where applicable, High resilience medium and firm foams are 2.7lb density.

## FRAME

All Van Gogh Frames are sturdily built from Baltic Birch Ply. Our 18mm thick ply has 13 laminated layers to provide the ultimate stability and structure for your frame. We confidently guarantee this frame with a limited 25 year pro-rated warranty.

Our frames are then joined, glued and stapled, ready to begin their journey to become your personally designed piece.

## SUSPENSION AND SUPPORT

Depending on the Style of your piece, your frame will have a superior support system to provide you with the most comfortable design possible.

We make 3 suspension systems that will consist of any combination of the following:

- A no sag sinuous wire spring, or S spring support connected with bridge wire at every intersection that is attached to our wood frames with noise dampening nylon coated steel clips. We use an 8 gauge sprung steel on our seat and a 12 gauge on our back support.
- An Italian 3" Pirelli webbing system that has elasticity, is carefully braided and woven across the seat deck or back frame.
- A flexible elastic webbed mesh support that acts like a trampoline for your seat cushions.

## CUSHION FILLS

Our cushions come in a few standard fills as well. Foam core seat cushions may be covered with a polyester fibre wrap, or feather and fibre wrap. Back cushions may come in a standard polyester fiber fill, foam and dacron wrap or a combination of feather and fibre fill.

We use water fowl feathers with a natural curve and a luxurious loft for the best fills available for your cushions. Feathers range in size from 2-4 cm in length and are meticulously washed and purified 13 times ensuring a premium product.
