

X-BRACE

X marks the spot when it comes to the simplest, most effective stabilizer on the market. MORryde's X-Brace stabilizers are a collaboration between MORryde and Winfield Products that install easily and provide enhanced lateral support. This means your trailer is stable, solid, and secure. Whether someone is walking inside the unit or you are experiencing strong winds, your trailer is rock solid because of the X-Brace design.

5TH WHEEL STABILIZER

- > Uses X-Brace design to provide exceptional stability
- > Installs in minutes unlike other products on the market
- > Unique turnbuckle design allows for easy adjustments
- > Helps distribute weight for a stable camping experience

SP54-180

SCISSOR JACK STABILIZER

- > Provides exceptional stability
- > Stabilizer jacks lift vertically, with very little lateral stability
- > Installs onto existing stabilizer jacks & locks in stability
- > Uses a tensioning tool to tighten and adjust the X-Brace
- > Perfect for front & rear travel trailers with scissor jacks
- > Works on the rear 5th wheel scissor jacks

SP54-181

HITCH MOUNT STABILIZER

- > For 5th wheels, Class C, Class A motorhomes and truck campers – just needs a hitch receiver
- > Provides stability from excessive or unwanted movement
- > Unique design provides for simple installation

SP54-182

Above. Beyond. Always.
