BATTERIES

- Alkaline Batteries recommended for extended battery life.
- Remove batteries during long periods of non-use.
- If lights do not activate the 9-volt battery may be unsnapped or exhausted. Open battery compartment and check.
- Always remove exhausted batteries from the product.
- Properly dispose of batteries safely.

CENTRAL CHEST COMPUTER

1. Push latch down to open battery compartment.
2. Snap one 9-volt battery onto clip and insert into battery compartment.
3. To close, slide two small tabs into slot and snap the BATTERY COVER into place.

Press red button on Central Chest Computer:
- Press once for flashing light sequence from STAR WARS: The Empire Strikes Back
- Press twice for flashing light sequence from STAR WARS: Return of the Jedi
- Press third time to turn off
SYSTEM FUNCTION BOXES  (Required Tool: Phillips Screwdriver (not included))

1. The battery compartment is accessed by removing the back plate from the System Function Box.

2. Remove the 4 screws located on the back at the outermost corners of the box, releasing the battery compartment cover.

3. Snap one 9-volt battery onto clip and insert into battery holder.

4. To reattach cover - position back plate so the belt is in the proper alignment and replace screws.

5. Be careful not to over tighten screws. This may result in stripping them or cracking the housing.

6. Repeat the process for the second System Function Box.

Press buttons on System Function Boxes:

- Press once to activate lights.
- Press again to turn lights off.

Approx 1 to 2.5 inches
