FOR IMMEDIATE RELEASE

New Wellness Center Hosting Grand Opening Celebration

(Denton, Texas, June 24, 2022) --- Regenus announced that its new Wellness Center is officially open to the public on Wednesday, July 6, 2022, at 3:00 p.m. Guests will enjoy a guided tour of the tastefully designed healing spaces, along with complimentary drinks, hors d'oeuvres, charcuterie, and desserts. The event will also feature a ribbon cutting ceremony and raffle prizes, including opportunities to win free guest services.

Located at 100 W. Oak St., #110 Denton, TX 76201, The Regenus Wellness Center's Grand Opening will provide the community with an inside look into its wonderful collection of programs and offerings. Regenus encourages guests to come and meet its founders and share collective ideas for the future health and well-being of the community, while enjoying tasty appetizers and drinks in its brand new, relaxing, and inspiring environment.

Regenus is at the forefront of integrative wellness, combining the healing elements of nature to nourish, detoxify, and regenerate the whole person from the inside out. As a haven for holistic learning, The Regenus Wellness Center offers a positive, nurturing environment with a host of healing modalities, including guided meditations, Reiki, Tai Chi, qigong, sound baths, massage therapy, facials, wine tastings, Sip & Spas, and much more.

“One of the things I love the most about Denton is the rising, community-wide interest in more activities focused on self-care and mind/body/spirit healing,” said Cindy Tysinger, founder of Regenus. “Instead of traveling to other cities for these experiences, we decided to embark on this journey of awakening more people to wellness, all under one roof, right here at home.”

From unique workshops to private gatherings and services, along with world class products and supplements, the Regenus Wellness Center is intended to be a major catalyst in the transformation and elevation of consciousness, both in the local Denton community and in its ever-expanding global family.

As a family-owned, women-led, heart-centered, and science-based B-Corp, the health and wellness of individuals and the community is at the forefront of Regenus' business initiatives. The company is committed to helping guests find their joy and align themselves with holistic wellness. Guests are invited to RSVP for a spot in one of Regenus' future sessions, or learn more about the event and center at: <https://www.regenus.com/pages/regenus-collective-wellness-center> or [regenus.com/events](https://www.regenus.com/events).
