FIRST IMPRESSION DOORS & MORE, INC.

Our commitment to our clients and to exceptional craftsmanship allow us to fulfill any residential product needs in South Florida. We strive to be the most dependable source for precise, beautiful, and durable Entry Doors with short lead times and on-time deliveries.

ABOUT MASTERGRAIN

MasterGrain products are a premium line of fiberglass door system components featuring the most authentic wood grain replication in the door industry. MasterGrain combines beauty and high quality construction to its fiberglass doors so you can see 'The Difference is in the Details.'

MasterGrain is proud of its investment in the Canadian and American manufacturing infrastructure, and truly understands the marketplace it serves. Through creativity, innovation and leading-edge technology, MasterGrain will continue to develop the finest door system components to protect and enhance your home.

PRESTIGE COLLECTION

The Prestige Collection is a line of coordinated door system components developed using our NVD technology. Coordinated doors, sidelites, lite frames, simulated divided lites, jambs and brick molds combine the low-maintenance benefits of fiberglass with the superior wood-grain finish of MasterGrain. The Prestige Collection is the only high volume integrated system of fiberglass components available in the door industry. The Prestige Collection is offered in Cherry, Fir, Alder, Mahogany, and Oak grains.

NICKEL VAPOR DEPOSITION PROCESS

NVD Technology is a patented process that authentically replicates any natural surface. The door process begins by hand selecting the most desirable wood pieces to build a real wood door. A silicone casting accurately picks up the finest details of the wood grain and is transferred into a door mold using our NVD (Nickel Vapor Deposition) Technology. The mold produces fiberglass skins used on MasterGrain doors with random grain depths and all the natural characteristics of real wood making our doors virtually indistinguishable from real wood doors.

WHY MASTERGRAIN FIBERGLASS FRAMES?

- Perfect grain match to all MasterGrain door components
- Equal expansion and contraction to fiberglass doors during extreme temperature fluctuations.
- Fiberglass frames are more rigid than competitive plastic frames. This ensures a tight weather seal to the door.
- Fiberglass will not warp or twist under extreme temperatures.
- The frames accept an extruded dry seal eliminating the need for messy caulking.

PLUGGED FRAME SYSTEM

Traditional screw system with matched fiberglass grained plug caps provide excellent glass retention.
