2022 FSC CERTIFIED MOULDING CATALOG
North America

What is FSC?

FSC is the world's most trusted sustainable forest management solution and its FSC certification ensures that products come from responsibly managed forests that provide environmental, social, and economic benefits.

As we continue to keep improving our footsteps to a more sustainable environment, we have developed the North America Sustainability Catalog with hundreds of frames that are FSC certified.

We value the importance of sustainability and it is part of our DNA to always keep improving and be on the lookout for new sustainable programs as they become available.

FAQs

Are FSC Certified frames costly?

We carry a wide array of mouldings to meet every price point.

Will FSC frames take longer to be delivered?

We already have in-stock availability, so the handling and shipping will be the same.

Will I be limited in purchasing FSC frames?

Not at all, we have in stock availability to purchase as many as you'd like.

Do FSC frames come in different sizes?

Yes, FSC-certified frames are available in various sizes, colors, and designs.

I can't find a frame I like?

We are looking for new frames on the daily to improve our catalog. Be on the lookout for more designs, colors, and textures in the future.

Do you provide certificates for the FSC Product?

Yes we do provide certificates for all FSC products.

Is it just moulding that is responsibly sourced?

No! Skyframe sources all supplies with sustainability in mind. Cardboard and Matboard are also sourced. We are always striving to do better, including recycling programs and soon sharing "green" acrylic products never before used in the framing industry.

Socially Beneficial

Socially beneficial forest management helps both people and society at large to enjoy long-term benefits and also provides strong incentives to local people to sustain the forest resources and adhere to long-term management plans.

One Tree Planted Partner

In 2020, we partnered with One Tree Planted, which is an organization that works globally with companies and brands in efforts to restore deforestation. One tree is planted across the globe for every order that is placed.

Economically Viable

Economically viable forest management means that forest operations are structured and managed to be sufficiently profitable, without generating financial profit at the expense of the forest resources, the ecosystem, or affected communities.
