

## joy mop

This mop is the BEST one I have ever used! Not only does it save a TON of space (the whole mop portion folds down and stores completely in the bucket itself) but it actually works so well and you can throw the mop heads in the wash!

## leaf blower

Don't knock it til you try it! I use a leaf blower to clean and it makes things a breeze! Open up your doors and blow that dust right out! Open up your car doors and blow the car completely out! Seriously, this is my favorite thing ever!

## wet/dry shop vac

I am obsessed with this shop vac! It is small so you can take it anywhere, has so many attachments, easy to dump out, has a long arm extender, AND can be used wet or dry! I use this WAY more than a conventional vacuum.

## steam clean

This is my FAVORITE non-toxic way to clean! This baby gets anything and everything spotless! I use it on my floors, cabinets, shower glass...you name it! Have a disgusting fridge? Yep, this is your bestie now.

## rubber broom

Sounds weird, I know...but the rubber broom is the BEST! I LOVE this thing! It extends SUPER long to easily grab cobwebs down, it can sweep up hair, water, anything! Best part is the bristles don't get disgusting. I can't stand conventional brooms when the bristles have pounds of hair stuck in them! If you have pets...this is for you.
