

## asics gel nimbus 25

These are my favorite running shoes! They are absolutely the MOST comfortable tennis shoes of all time. There are so many colors and they are also very true to size. They feel like gel clouds.

## new balance fuelcell

I absolutely LOVE these! They have a carbon plate in them which is so cool! They are SO light and are VERY comfortable. I can walk for hours and hours in them, workout in them, anything!

## cloudsurfers

These are 100% my daily drivers! I wear these so much I have two pairs so I can alternate them as I pop the other pair in the wash. To me, these are also really cute and for some reason they make your feet look TINY. They are SO comfortable. I've done hundreds of miles in these bad boys.
