

How to Change Voltage from 110 to 220 in MP Units

1. To begin, unplug your unit
2. Open up your MP unit by removing the outer shell
3. Next, find the three small silver prongs on a black piece next to a white piece with two silver prongs
4. The fuse will be placed on this black piece with the three small silver prongs
5. Find the small black jumper on the board
6. Next, move the jumper forward one prong
7. Then, secure the prong in place by pressing it down
8. By moving the jumper forward, you have successfully changed your unit to 220 volts
