EXTENDABLE ACCESSORY HANDLES AND HEADS

Extendable Accessory Handles

Level 5 extendable accessory handles are the best value on the market, are easy to use, and make working at various heights a quick and easy process. These lightweight handles allow you to quickly and easily adjust handle length for improved efficiency on the job. All handles and heads are made of strong, lightweight anodized aluminum that will give you the performance, convenience and reliability you need on the job site.

Interchangeable Head

Level 5 has designed the extendable accessory handle head so it can accept all of the different attachments required for each tool. This means you can save money by purchasing just ONE extension handle and the four heads that go with the accessory tools you own. A quick-release thumbscrew makes changing the head a quick and easy process.

Product Care and Cleaning

Keeping any tool clean and in good working order is imperative to achieving the highest quality finish with every job. Here are some tips to keeping your Level 5 extendable accessory handles and heads in great condition:

- Joint compound should never be allowed to dry on the tools.
- Tools should be immersed in a bucket of clean water when not in use for short periods of time during the day.
- Tools should be cleaned completely at the end of each day.
- Once the tool has been completely cleaned and rinsed, coat all parts with a lubricant. We recommend a light machine oil like 3-IN-ONE Multi-Purpose Oil for lubrication and maintenance. **DO NOT USE SILICONE OR OTHER SPRAY LUBRICANTS SUCH AS WD-40®.** These materials can have an adverse effect on rubber parts.
