

**SUITABLE FOR TAPING JOINTS
& INTERNAL ANGLES**

HIGH QUALITY & SUPERIOR ADHESION

AVAILABLE IN WHITE OR TINTED

WHAT IS IT?

Pro Top is a mid weight finishing compound with low shrinkage and easy to apply. It delivers a smooth finish that is virtually pock free.

WHEN TO USE IT?

Pro Top can be used on all plasterboard joints, angles and fasteners when used as the final coat over all purpose and base coat compounds.

| Fastener Cover: | Excellent |
| Metal Bead Cover: | Excellent |
| Sanding: | Easy - 180 to 240 grit |
| Colour: | White |
| Packaging: | Bucket / Refill Carton |

Job conditions: Apply over dry surfaces only. Maintain minimum air, joint compound and surface temperature of 13C within a working area until joints are completely dry.

Ideal tool usage: Automatic & Hand Tools

Setting Time: Air Drying, allow to dry thoroughly between coats (can be up to 24 hours depending on climatic conditions)

Mixing / Dilution: Thinning is not normally required, if needed mix lightly and test apply prior to adding any additional water. Do not over mix to prevent pocking.

Product Hints: Always use clean tools to stop the likelihood of product contamination. Allow to dry thoroughly before applying the next coat. Base cements are not to be applied over Pro Plaster Products Lightweight Taping Compound. Note: Humidity can effect drying time.

Product Warranty: Pro Plaster Products warrants this product to be used on any plasterboard surface when the manufactured plasterboard complies to Australian Standard AS 2588. In the event of any failure of the product caused by the direct result of a defect in the material or manufacture of the product, Pro Plaster Products will at its option replace or repair, supply an equivalent product, or pay for doing one of these.

Relevant Standard Compliance: Meet or exceed ATSM C-475 "Standard specification for Jointing Compound and Joint Tape for Finishing Gypsum Plasterboard"

Alternative Products: 4T Multi-Purpose, Hamilton All Purpose
